

NEW SUSTAINABLE PACKAGING FOR VEND-READY ITEMS

To reduce our environmental impact, we're transitioning to more sustainable packaging for vend-ready items. This includes displacing plastics with biodegradable and recyclable materials and using less packaging where possible. Until new packaging is fully implemented, you may continue to receive vend-ready items that use previous packaging methods.

Individual Vend Packs

We're switching from plastic and rubber band packaging to recyclable paper bands.

Carton Packaging

We're transitioning inner carton group packaging to biodegradable bags.
