Lighting & Controls

Everything we do is always
to improve your business.

Lighting & Controls: What's new in 2022?

This year we've expanded our selectable offering to now include wi-fi enabled fixtures that are user friendly, accessible and adaptable for the future to create the ultimate environment. Whether you're a restaurant, a pub or looking to entertain at home, our new wi-fi enabled fixtures allow you to set the colour to create any environment for any occasion. Maybe you're looking to spruce up your outside soffit lighting with a Christmas theme, or set your indoor lights to party mode, with RGBW technology built right in you can now mix and match colours to create the perfect ambience.

Wi-fi enabled controls are also easier to program than a traditional wiring system, making controls more accessible and user friendly than ever before.

From a commercial perspective we've expanded our selectable offering to include interior and exterior fixtures. From strips, wall packs, high-bays, panels and recessed fixtures, we've stocked up on the preferred products you require for your day-to-day needs.

We invite you to explore all we have to offer in our latest lighting promotion.

Our Experienced Lighting Team: Here to make your life easier

Did you know that we have experienced Lighting specialists to help design the right lighting solutions for your unique project? From value engineering to energy consumption estimates and support with government rebates, we're here to help every step of the way.

By partnering with a distributor, our lighting specialists are able to access a wide selection of in stock inventory bringing more choice, higher quality and competitive prices to our customers.

In stock at Gescan

INTERIOR LED LIGHTING

Lamps & Ballasts • Recessed • Decorative • Highbays • Vapour tights • Wraps & Strips • T-Bar Fixtures

EXTERIOR LED LIGHTING

Floods & Wallpacks • Surface Canopy & Security • Street Lighting • Solar Powered

INDUSTRIAL LIGHTING

High Abuse • Explosion Proof

SECTORS OF ACTIVITY

Residential • Multi Dwelling Unit (MDU) • Commercial • Healthcare • Hospitality • Institutional • Industrial

Earn 2X AIR MILES® Shop at Gescan to double-dip your AIR MILES® on Participating Brands!

- Earn 2 miles for every \$30 spent on eligible items when you pick up your order.
- Earn 2 miles for every \$100 spent on eligible items when you choose delivery.
- Earn 2 miles for every \$300 spent on eligible items when you order directly from our manufacturers.
- Bonus points will be added 4-6 weeks on all paid orders after the close of this promotion.

Promotion runs March 9 - April 10, 2022

The Lighting Team

Daniel Haig

Daniel Haig is the Lighting Business Unit Manager at Gescan and is responsible for leading a team of Lighting Specialists across Canada that assists customers with the supply and design of lighting systems. With forty-five years of experience, Dan is responsible for mentoring lighting specialists and is an important resource for Gescan's people and customers. He is responsible for providing educational tools for sales teams and counter associates to help them better understand our lighting product offering and inventory strategy. He also explores cutting edge lighting products that bring customers more choice and quality at competitive prices.

"I want our customers to identify with Gescan as the place to get quality lighting products and the proper responses to their lighting challenges."

Dan Haig, Lighting Business Unit Manager

**Watch the Eco-Lutions
video to learn more**

James Lee

James Lee is a Lighting Specialist at Gescan responsible for providing expertise and support on lighting products and projects for the region of British Columbia. With over ten years of experience, James provides region and sales reps with updates on new lighting products, supports sales team with providing design builds and generates and presents costs savings opportunities with respect to BC Hydro Incentive Programs. He is also responsible for performing lighting layouts on customer projects.

James studied Marketing and Sales Management at University of British Columbia. Prior to joining Gescan, James worked in a variety of technical lighting roles for major manufacturers and distributors.

Our team of lighting specialists help our customers with the supply and design of their lighting systems. With expertise in light level documentation, energy consumption estimates and government incentive programs, our team of specialists work closely with contractors, architects, interior designers, engineers, developers and property managers to implement practical and innovative lighting solutions.

Doug Palmer

Doug Palmer is a Lighting Specialist at Gescan responsible for providing expertise and support on lighting projects for the region of Winnipeg. With twenty-two years of experience Doug provides region and sales reps with updates on new lighting products entering inventory, supports our sales team with providing design builds and provides energy consumption estimates for LED retrofit projects from Manitoba's Rebate Program. He is also responsible for performing lighting layouts on customer projects.

Doug is a graduate of the University of Manitoba with a Bachelor of Commerce. Prior to joining Gescan Doug worked with a lighting agency to help bring LED technology to the mainstream market in Manitoba.

Devon Derkuch

Devon Derkuch is a Lighting Specialist at Gescan responsible for providing expertise and support on lighting projects for the region of Southern Alberta. With two years of experience, Devon acts as a key contact for the sales department and projects group to help find products that would satisfy the needs of customers. He is also responsible for coordinating lighting package components of projects, supporting the sales team with design builds and performs lighting layouts on customer projects.

Prior to becoming a lighting specialist, Devon worked within various departments at Gescan including Counter Staff, Inside Sales Representative and in the e-Commerce department.

Commercial LED DRIVER Replacement Program

The LED driver replacement program allows you to replace the drivers on fixtures that are coming up on their warranty. We will program the driver for you to meet the original LED fixture application for recessed downlight, linear troffer and outdoor/industrial.

Complete 3 EASY STEPS for us to quote your drivers

1

Take a picture of the original driver
(make sure the label of the program settings is legible)

2

Record the driver specification information

- Luminaire Type: Recessed, Linear, Exterior (information from the original driver labelling will be used to pick the correct replacement and to program it correctly)
- Voltage
- Class 1 or 2
- Constant Current or Constant Voltage

- Output current setting
- Output voltage setting
- Minimum Dim level (0-10V)
- Size of Driver
(To make sure the replacement will fit in the existing fixture)

3

E-mail the picture and driver specification information to GescanLEDriverExpress@gescan.com
and we will match the correct replacement programmed driver for your existing fixture.

Controls

Simple, scalable, and
easy to install products

Going “touch-free” is the new normal

To help slow the spread of germs, the CDC recommends frequently disinfecting things we touch a lot – like light switches. But what if you could turn on the lights without touching anything at all? Add a Smart Bridge so your customers can go touch-free by using scenes and schedules. Use it for voice control, scheduling, scenes, geofencing, and more. And with Clear Connect Technology built in, it doesn't rely on Wi-Fi, so it's always fast and reliable.

Starting with simple home solutions and going to more complex commercial solutions, you'll find the touch-free products that can be used by themselves, or as part of a bigger system. From plug-ins, to switches and sensors, we're featuring products that have the cutting-edge technology to ensure you get the accuracy and reliability you need for your next job. We invite you to check out the options available to you or scan the QR code to learn more on our website.

Commercial Touch-Free Controls

In the new normal, Employers will consider using sensor data to understand how their spaces are being used to make floor space optimization decisions for new modular layouts.

Whether that's one room or a floor, the hub allows for integration between devices, and their app allows you to view the data centrally to help your clients save energy, meet code compliance and help limit the interaction people have with their switches.

Programming is as easy as tuning your car radio, with patented technology that automatically selects and associates nearby wireless devices:

- PowPak wireless dimming and switching modules
- PowPak Wireless Fixture Controllers
- PowPak 20 A Relay Modules
- Maestro Wireless dimmers and switches
- Wireless Receptacle controls
- Pico remote controls
- RadioPowrSavr occupancy sensors and daylight sensors.

STARTER
VIVE WIRELESS HUB

LUTHJSOFM

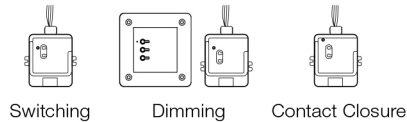

How to Create Zone Control with a Vive System in 3 Simple Steps

Step 1

Choose dimming and/or switching modules

Options available:

- Switching, 0-10V, 347V, phase dimming, Ecosystem, contact closure

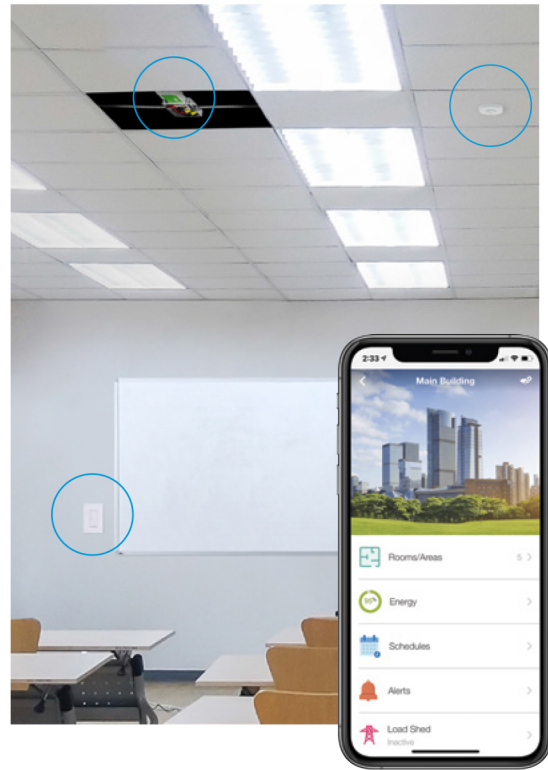

Installation:

- To control a group of lights, simply wire one load controller in front of the first fixture in the zone

Programming:

- To pair, hold the power button on your load controller for 10 seconds to put it into listening mode
- Then press the off button on the Pico remote or the light bulb button on the occupancy sensor

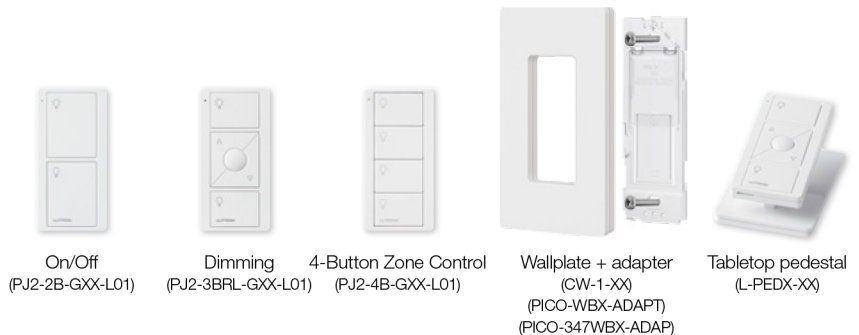

Step 2

Choose the right wireless remotes for your job to add personal control

No need to run wire for 0-10V dimming:

- Pico wirelessly pairs in 10 seconds
- Guaranteed 10-year battery life

Pico remotes sold separately

Step 3

Add wireless sensors to your job with no wire runs

Simple installation for occupancy or vacancy sensing:

- Same easy, 10-second wireless pairing
- Guaranteed 10-year battery life
- You can add 10 wireless devices to one 0-10V dimming module
- Daylight sensors also available

Eco-lutions

ENERGY AUDIT SOLUTIONS

Better bulbs, better bills, better planet

Why make the switch?

A decade or two ago setting environmental goals was a way to manage a corporation's reputation, today sustainable building practices are well underway, with governments, utilities and corporations working towards a more resource-efficient model of design, construction and operation.

However, there's still work to be done, with many businesses' using old and inefficient technologies that produce greenhouse gases and contribute to global warming.

Making a simple switch to LED's can reduce your energy consumption, lower operating costs and produce less greenhouse gases. Better still, businesses in BC can take advantage of funding supplied by BC Hydro for energy-efficient commercial retrofit LED lighting projects.

**"Let us do
the legwork."**

- James Lee, Gescan Lighting Specialist

Gescan Energy Audit Solutions partnered with the BC Hydro Program

Switching to LED's can save you 20-50% more on your energy bill. Ask for our one-page ROI analysis to see upfront costs, estimate the value of rebates, view your monthly energy and maintenance savings and see the costs of waiting. The longer you wait to implement energy-efficient technology, the more you miss out on realizing ongoing energy and maintenance savings.

Step 1: 45-minute on-site audit to verify fixtures

Step 2: ROI analysis provided to client for signoff

Step 3: Assist in preparing the project proposal

Our Partners

We work with our trusted partners to bring cost-effective, energy-efficient, BC Hydro approved fixtures to our customers.

Receive rebates

Reduce project costs
by up to 50%

Eco-friendly LEDs

LED Lasts 10x longer and are
20-50% more energy efficient

Qualify in 45 mins

See an ROI in less than 2 years.
In some cases, total savings could be
greater than the cost of installing.

Hassle & risk-free

Making the switch to eco-friendly
LED's is easy with our no-obligation
Eco-lutions services

Discover how much you could be saving. Ask our lighting specialist
James Lee at james.lee2@gescan.com for a complimentary ROI analysis.
