## Smart Solutions for Today's Connected World

Supporting you with application knowledge, accurate budgeting, product selection and local inventory.

**TALK TO A SPECIALIST**

Early involvement of an ICT design-build partner is key to controlling costs and achieving project goals.

# ICT Residential Solutions

## Get Connected at Home

In today's connected households, networks need to perform simultaneously for multiple users and devices. But many users are finding the Wi-Fi in their homes getting bogged down. Meetings freeze, music doesn't play, cameras go offline, and the show streaming on the TV is just a constant spinning wheel of doom; everyone is getting frustrated. Most physical residential network infrastructures were designed for phones and TVs, not 50+ Wi-Fi and wired network devices.

At Gescan, we support customers in designing and building high-performance, futureproof home networks. Plus, from whole-home Wi-Fi and automation to smart lighting control and multi-room audio, we have all the products necessary to meet the network demands of the modern home.

NEW PRODUCT

LinkIQ™ Cable+Network Tester

FLULIQ100

## LinkIQ™ Industrial Ethernet Cable+Network Tester

Operational Technology professionals responsible for maintaining and/or managing an industrial network have a challenging job. They are on-the-spot problem-solvers and are always planning for future enhancements to seamlessly upgrade the network to higher speeds.

### LIQ-100 enables you to:

- Validate cable performance to support Ethernet/IP, PROFINET, EtherCAT
- Identifies miswired and split pairs on RJ45, M12X, M12D, and M8D terminated cables
- Identify connected switch information (Switch Name, Port Number, and VLAN)
- Install and troubleshoot PoE devices via Switch Negotiation and PoE Load test
- Document your work through LinkWare™ PC

# ICT Commercial Solutions

## Control Costs & Achieve Project Goals

Information and communications technology (ICT) is imperative to a business's operations and success. For an organization, an improved ICT infrastructure means improved performance in strategic areas such as customer service, productivity, cost reduction and innovation. Creating a high-performance, future-proof commercial network to support all of these activities requires planning, preparation, experience and extensive product knowledge.

From Wi-Fi design, provisioning and testing to Power Over Ethernet (PoE) Systems, large-scale AV solutions and more, our ICT Specialists help spec, budget, procure and manage commercial ICT project needs.

At Gescan, we support customers in designing and developing high-performance, future-proof commercial networks to deliver optimized operations and productivity for businesses. From premium cables, patch panels and cable trays to AV racks and cabinets, Uninterrupted Power Supply units and bypass panels, we have all the products necessary to meet the network needs of today's modern business.

Smart ICT Solutions

NEW PRODUCTS

IT professionals trust APC's award-winning Smart-UPS™, Power Back-UPS, Bypasses and more to protect equipment and critical data from costly interruptions by supplying clean, reliable, network-grade power and efficiency. APC connected EcoStruxure Ready Smart-UPS deliver premium power protection to servers, point-of-sale, routers, switches and hubs while enabling remote monitoring and management of IT infrastructure via a secure, cloud-based software.

# ICT Tools Solutions

## ICT Installation Tools

From wire crimpers, strippers and cutters to electrician's scissors, data plugs, testers and tracers, reduce installation time with essential tools for installing and maintaining information communications technology systems and solutions.

Ensure fast, reliable connector installation with Kleins exclusive Pass-Thru™ Connectors, fully compliant with Power Over Ethernet (PoE and PoE+) standards. And make effortless, uniform connections with Fluke Networks' DB14, all-in-one telecom punch-down tool.

## Featuring the On-Q® Punch & Go Tool

Never punch into the palm of your hand or through drywall again. The On-Q® Punch & Go tool from Legrand lets you seat and cut all wires at once with a squeeze of the handle to deliver consistent terminations every time. No compromised connections or wasted jacks. Replacement heads available and in stock!
