ENERGY AUDIT SOLUTIONS

Our lighting experts have decades of experience selecting the right LED fixtures for provincial grant programs. In fact, businesses who make the switch to LED's often see an ROI in less than two years.

-  **Save Money**  
Save up to 50% on LED investment costs, reducing payback periods for up front investments with rebates from BC Hydro.
-  **Save the Environment**  
Our LED's contain non-toxic materials and are 100% recyclable, unlike other incandescent and HID bulbs.
-  **Save Time**  
Our lighting experts have experience selecting the right LED fixtures for provincial grant programs.

# Make the switch to Eco-friendly LED's

## Better bulbs, better bills, better planet

A decade or two ago setting environmental goals was a way to manage a corporation's reputation, today sustainable building practices are well underway, with governments, utilities and corporations working towards a more resource-efficient model of design, construction and operation.

However, there's still work to be done, with many businesses' using old and inefficient technologies that produce greenhouse gases and contribute to global warming.

## Why make the switch?

Making a simple switch to LED's can reduce your energy consumption, lower operating costs and produce less greenhouse gases. Better still, businesses in BC can take advantage of funding supplied by BC Hydro for energy-efficient commercial retrofit LED lighting projects.

### RECEIVE REBATES AND:

Reduce project costs  
by up to 50%

See an ROI in less  
than 2 years

In some cases, total  
savings could be greater  
than the cost of installing

### ECO-FRIENDLY LEDs:

Last 10x longer

Are Co2-friendly

Are 20-50% more  
energy efficient

## Receive incentives from **BC Hydro**

### Find out if you qualify

Take advantage of BC Hydro's Business Energy Saving Incentives (BESI) and Self Incentive Program (SIP) and save up to 50% on LED investment costs, reducing payback periods for traditional lighting conversions.

### Why LEDs?

Conventional lights such as fluorescents often contain harmful mercury which has negative effects on the environment.

Our LED's are more eco-friendly containing non-toxic materials and are 100 per cent recyclable unlike other incandescent and HID bulbs.

# Your time is valuable,

Our lighting experts have experience selecting the right LED fixtures for provincial grant programs and have been performing energy audits in commercial and industrial spaces for decades.

As a member of BC Hydro's Alliance of Energy Professionals, we'll work with you through the BC Hydro application process saving you time on searching for eligible fixtures and figuring out whether they are compatible with your existing controls.

# let us do the legwork

## What's the cost of waiting?

Switching to LED's can save you 20-50% more on your energy bill. Ask for our one-page ROI analysis to see upfront costs, estimate the value of rebates, view your monthly energy and maintenance savings and see the costs of waiting. The longer you wait to implement energy-efficient technology, the more you miss out on realizing ongoing energy and maintenance savings.

# Largest selection of Eco-Friendly LEDs

## About our Eco-Lighting

We have over 20,000 lighting fixtures currently in stock including indoor and outdoor lighting fixtures, lamps, controls and replacement parts. Our smart eco-friendly fixtures are BC Hydro approved and can be easily accessed through our comprehensive e-commerce website, mobile app, or in branch.

## Our Partners

We work with our trusted partners to bring cost-effective, energy-efficient, BC Hydro approved fixtures to our customers.

## About Gescan

With over 60 years of industry experience, Gescan has 26 stocking branches located across Western Canada.

With over 275,000 sq. ft of inventory, our priority is to have the breadth and depth that our customers need in stock. We leverage our multi-channel distribution network and our powerful logistics to optimize the supply.
