

GESCAN AUTOMATION

The Gescan Automation dedicated team of specialists provide tailored solutions for your Automation needs. The combination of knowledge, technical resources, support services and product breadth allows Gescan to provide a complete solution.

Whether you are developing a new control system for a process skid, architecting a plant-wide control system, or are in need of a specific component to optimize an existing control solution, Gescan is there every step of the way. Gescan has over 30 years of experience with GE PLC & IO products, HMI SCADA Software and Operator Interface products (now Emerson Automation) in a wide range of end user and OEM applications. Gescan Automation can provide everything you need to build out your control system from sensors to cyber security.
