Top Considerations when Shopping for an Inventory or Asset Management Solution

Efficient asset and inventory management software is critical for businesses to reduce costs and ensure optimal utilization of existing inventory and assets.

Businesses that use an inventory or asset tracking solution experience:

⬆ **up to 28%** increase in productivity[1,2]

⬇ **20%** reduction in equipment downtime[1]

⬇ **17%** decrease in inventory maintenance and repair[1]

⬇ **10%** reduction in inventory costs[2]

Security & Encryption

Our solutions are **securely hosted by Amazon Web Services (AWS) and use AES 256 encryption**, among many other precautions to ensure our customer's data is secure.

For customers that have policies against hosting data in the cloud, we also offer an on-premise solution.

Cost/Price

Our **cost-effective inventory and asset management solutions** boast the most competitive pricing in the industry.
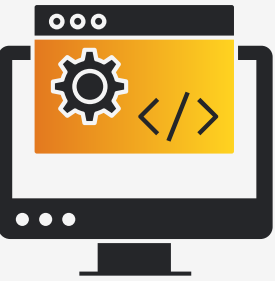

Ease of Use

Our solutions are **easy-to-use** and easy to train others on.

Features/Functionality

Our solutions include **robust features and functionality designed to meet your specific tracking needs** and grow with your business.

Customization

With our inventory and asset management **you can design custom reports, create custom fields, set custom notifications, and more** to meet your specific business or tracking needs.

Integration Support

Our APIs allow you to connect your software to other solutions your company uses internally. Build it yourself or let us build it for you. Wasp also offers out of the box integrations for e-commerce storefronts like Shopify, WooCommerce and Big Commerce as well as ShipStation.

shopify   BIGCOMMERCE
WOOCOMMERCE   ShipStation

Implementation & Tech/Customer Support

Our **dedicated experts provide comprehensive post-sale services**, including on-site and virtual training, technical support, data import, customer success, and account management.

- On-Site Training
- Virtual Training
- Web Installations

Productivity Improvements

Our solutions **automate your asset and inventory management processes**, thus maximizing your productivity.
