What to discuss during your veterinary visit?

Your veterinarian is your dog's healthcare expert and they can make the best recommendation about medications for your dog. There are a few important things to discuss when evaluating your dog's heartworm disease and intestinal parasite protection needs.

- How to switch from your current preventive worm medicine to Interceptor Plus
- Testing for heartworm disease
- Discussing the severity and possible sources of an intestinal worm infection
- Taking stool samples and running tests
- Your dog's weight and age -Interceptor Plus is approved for dogs and puppies 6 weeks and older, and who weigh 2 pounds or more
- Any allergies that your dog has
- Any other medical conditions your dog has
- Your dog's lifestyle to determine which worms are of concern
- The need for year-round parasite protection
- How you administer oral medicine to your dog, and whether he/she usually takes oral medicine well
- What to do if a dose is missed
- How to store Interceptor Plus in your home
- Are 12-pack for year round protection or auto-ship available
- Any eligible rebates for Interceptor Plus
