## Women in Golf Charter – statement of intention

The Slovak Golf Association is delighted to announce that agrees to become the signatory of the Women in Golf Charter.

The Association will focus on developing a suitable environment inspiring more women and girls to be interested in golf.

In the line of the general attitude to attract and improve the gender balance, we focus on bringing more ladies to golf starting the season 2020.

Regardless this resolution we can declare, that there are already ladies within our national structures, such as the office of the association, referees in couple of the clubs, committee for the youth, handicapping & course rating committee.

A certain initiative supporting our female players to achieve top-sport objectives reflect their effort to start studies at the US universities.

Two years ago, we have begun supporting a TV sport presenter to get deeper into the golf. She got a very close attitude including playing golf. She is supposed to help us in spreading the right name golf and the following objectives nationwide.

The association's pledge to:

- Support the women to get involved more in golf
- Promote the women's golf at the street promos cooperating with popular female followers
- Support establishing new TV sport channel of the national broadcaster RTVS and its female presenter
- Bring more mothers and grandmothers to golf /their families will follow/

Looking forward to cooperating with R&A to achieve more women and girls playing, working and devoting to golf.

Tomáš Stoklasa  
President of the Slovak Golf Association
