

Golf green quality standard

Start date: 1 January 2020

Project duration: 9 months

The objectives of this project are to:

- Define the concept of quality, in terms of golf greens, in both broad and narrow contexts.
- Review the current information available on greens quality, standards and measurement tools currently available.
- Synthesise these findings into a white paper, which will be discussed by industry stakeholders to try and attain a consensus view.
- Produce from the consensus view a set of proposed standards, the processes needed to assess these quality standards, the limitations of their use and guidance on their implementation.

This project will be delivered by STRI Ltd.
