

The Tunisian Golf Federation is proud to announce its support to Women in Golf Charter and encourages the R&A to move forward with its societal and golf sport future responsibility.

For more than eight years, TGF has been working for inclusive and accessible golf for women and girls by making decisions and taking actions that affect plans/ TGF legislation and golf activities.

Across TGF legislation:

At least one woman must be in the TGF members board committee, decision adopted and included in our legislation.

TGF organized many free open days for women and girls (students and other) to increase the number of women licensees;

All the actions of Pro training and referee must have girls or women among the participants;

We established a regular girls and ladies Tunisian Championship;

We have a girl's national team with separated training and tournament activities;

TGF succeeded in including a girl into a sports university and she graduated with golf as speciality and started graduate studies.

The TGF will recruit a Pro woman in charge of golf development in primary schools.

As signatories of the charter, we hereby undertake to:

Continue to support and develop the above actions and decisions;

Work to balance the ratio of male to female golfers and take all the necessary decisions to reach this goal;

Help associations in hosting girls and women in the best of conditions;

Attract women and girls to golf courses by promoting family participation in tournaments and events.

Include all the actions to be taken into the TGF strategic plan.

We are dedicated to achieving our goals and developing an inclusive sport of golf.
