

## To The Resident

### Stage 4 Road Upgrade - Camp Flat Road, Bli Bli

#### Project summary

Sunshine Coast Council is committed to the ongoing improvement of local road networks within the region.

Council has received partial funding from the Department of Transport and Main Roads (TMR) Transport Infrastructure Development Scheme (TIDS) to continue the upgrade along Camp Flat Road, Bli Bli.

Stage 4 will resume from the previous section of Camp Flat Road completed in 2021 and will include the Whitecross Road intersection.

See figure 1 overleaf for details.

#### Start date

Tree clearing works for a new Energex corridor is planned to commence 12 June 2023 with early works expected to start in July 2023, weather and site conditions permitting.

Tree and vegetation clearing is required to meet both design guidelines and safety standards.

The design has been carefully reviewed to minimise vegetation clearing wherever possible, while still providing a safe and conforming roadway upgrade.

As part of council's commitment to sustainability, Council's Natural Areas Management team will seek to salvage debris, such as hollow logs, and use to provide fauna habitat nearby as well as providing offset planting.

An experienced fauna spotter-catcher will be in attendance to manage and supervise all terrestrial fauna management activities prior to and during tree removal works.

Early works will include the construction of a retaining wall on Camp Flat and Whitecross roads intersection, as well Energex and NBN relocations.

More details will be provided to the community prior to these early works commencing.

The main construction is expected to commence in late 2023 / early 2024. Further information will be provided prior to this main construction phase.

#### Traffic management

To facilitate the safe and efficient delivery of this road upgrade, Council is planning to implement both single lane and full road closures during construction (when necessary) to ensure the safety of all road users and minimise the duration, cost and environmental footprint of this project.

We thank you in advance for your patience and cooperation while we deliver these works.

#### Further information

For further information about this project, please contact council's project officer Clint Jones via the details below (please quote project number K2723).

### A note from your local councillor

Council successfully secured partial grant funding through the Federal Government's Local Roads and Community Infrastructure Program which has enabled us to bring forward improvements to Camp Flat Road. These works should address some of the issues faced by residents and drivers at this stretch of road. We appreciate your patience and understanding while construction occurs.
