

Hygienic Design Certification

Commercial Food Sanitation® (CFS®) Hygienic Design Certification combines digital learning and in-person training to build and strengthen your hygienic design knowledge—and your résumé. This blended learning pathway builds your professional credibility, certifying you to apply, improve, and maintain hygienic design principles in food processing facilities. Plus, CFS's recertification program—required every 3 years—ensures your education stays up to date.

What the pathway looks like:

- Complete CFS Hygienic Design Training
- Further deepen your skills completing our online modules at your own pace
- Apply what you've learned in a final online case simulation as well as a personal growth reflection exercise
- Stay up to date through recertification, required every 3 years

What you'll learn:

- How to implement hygienic design principles and solutions at your company
- Building business cases for hygienic design projects
- Equipment and layout design that improve food safety and operations
- Creating cross-functional teams that work toward a shared goal

An Intralox Company

CFS is your trusted partner to reduce food safety risk and strengthen food safety leadership. Our experts challenge and advance industry practices globally with strategic consulting and robust education programs, fulfilling our mission to make the world's food supply safer.
