

HYGIENIC DESIGN TRAINING

The Food Sanitation Institute, an initiative of Commercial Food Sanitation, is committed to developing sanitation professionals in the food industry. With that in mind, we are pleased to offer our Hygienic Design Training to professionals in the food industry who have the desire to learn critical details about hygienic design of equipment and facilities. This course is a prerequisite to our Advanced Food Industry Leadership Training.

LEARNING OBJECTIVES

- **Apply hygienic design principles for equipment and facilities**
- **Discern how and why hygienic design affects food safety and what tools are available**
- **Have the opportunity to truly experience everyday hygienic design challenges**
- **Drive hygienic design solutions—temporary and long-term—at your company**
- **Recognize who needs to be involved in projects that impact food safety and how to work effectively together toward a shared goal**
- **Develop strategies for making a business case for hygienic design projects**

Hygienic Design Training courses are highly effective and unique due to the hands-on, practical application of materials taught in the classroom. Sessions are taught by industry-recognized subject matter experts of the Food Sanitation Institute and participants are tested to help ensure proficient competency in offered training topics. At the end of the 2½-day training, successful completion will be recognized with a certificate.

TRAINING TOPICS

Training includes existing hygienic design standards guidance, checklists, regulations, hygienic equipment design principles, hygienic principles for facility design, traffic patterns, zoning, material selection and compatibility, importance of managing utilities, and project management basics.

DEDICATED SESSION

Would you like a session for just your company? All courses are available as dedicated sessions, which include the possibility to use the training location for your internal meeting after training ends. Contact us for more information at training@cf-san.com.

REGISTRATION AND COST

Registration and participation costs in the 2½-day training include classroom and workshop setup, handouts of training materials, certificate of completion, lunch, and a group dinner.

The training fee is USD 1395 / EUR 1195 / RMB 7800, and participants who sign up early are eligible for an early bird discount. We limit participation on a first-come, first-served basis so we can guarantee each participant receives an optimal learning experience.

A CFS Training Passport is available for only USD 4800 and allows any individual to attend Sanitation Essentials Training, Hygienic Design Training, and Advanced Training within a two-year period from the date of purchase.

TRAINING CALENDAR

We offer hands-on Sanitation Essentials Training, Hygienic Design Training, and Advanced Training at Intralox's training facilities in North America, Europe, and Asia.

Sessions may sell out quickly, and we continuously open new sessions for registration.

FURTHER TRAINING

DIGITAL TRAINING

As part of the CFS commitment to helping you reach your food safety and hygiene goals, we are developing supplemental digital training in addition to our in-person, hands-on training.

Targeted at developing your food safety, sanitation, and hygienic design expertise and knowledge, the digital training allows you and your team members to grow and develop on an ongoing basis from the convenience of your own workspaces.

See what is available today and stay tuned for more digital training courses.
