ABBOTT PRODUCT SPECIFICATIONS**FRAME CONSTRUCTION**

- Steam-bent frame is constructed of kiln-dried European beech
- Wall-saver legs flare slightly so they contact the baseboard first, saving the wall's finish
- Seat rails are reinforced with wood corner blocks and cleats attached with glued and wood screws
- Joints are securely fastened with mortise and tenon joinery or double-doweled construction to ensure long-term use

SEAT CONSTRUCTION

- Seat suspension is constructed of plywood that is machined to form an open perimeter. Unidirectional webbing is machine-stretched across the open perimeter and stapled to the edges to form a comfortable, secure suspension
- Seat assembly is attached with wood screws to wood cleats on the frame
- Seat cushion is made of 1¼" thin profile, high resiliency, CFC-free foam for maximum comfort and durability
- Seat upholstery is wrapped over the seat cushion

BACK CONSTRUCTION

- Upholstered back on applicable models is constructed of two panels that are sandwiched together. Each panel features a contoured 3-ply cross-banded plywood inner panel. Inner panels are covered with high resiliency, CFC-free foam (½" on the front and ¼" on the back). Upholstery is wrapped around the inner panels and secured with upholstery staples. Both front and back upholstery are securely attached to the wood top and cleats with Christmas tree fasteners
- If clean out feature is desired, specify open back model, which is open below the wood top and slat to the seat
- Wood top on upholstered back with wood top model and open back model is curved for back support and comfort

ARMS

- Steam-bent, curved arms provide comfort and a unique design that complements various settings

GLIDES

- Nylon glides are ¾" in diameter

CONTRASTING FABRICS

- Contrasting upholstery on backs and seats is available. If different price grades are selected, use our electronic specification tool for accurate pricing

FINISH

- Wood finishes applied to solid hardwood are complementary to the same wood finish applied to wood veneer, but not an exact match

WOOD SPECIES

- Beech

SURFACE MATERIALS

See the Kimball Hospitality Surface Materials Reference Guide at kimballhospitality.com for a complete overview of our materials program, including:

- Characteristics of wood
- Special wood finishes
- Customer specified laminate (CSL)
- Customer specified paint (CSP)
- Fabric application and colorways
- Customer's own material (COM) process overview
- Alliance program

ALLIANCE FABRIC PROGRAM

Kimball Hospitality has analyzed each model to most accurately reflect the COM/COL yardage requirements shown on page 26.

The yardage requirement for each model is based on 54" wide fabric and cutting the fabric up the roll.

If repeat is larger than 18", contact Customer Service to confirm the correct amount of yardage required. When ordering 10 or more chairs in the same COM, yardage requirements may be reduced.

Contact Customer Service.

PRICE GRADES A-R

See Surface Materials at www.kimballhospitality.com for a wide variety of graded-in fabrics from Arc-Com, CF Stinson, Designtex, Maharam, Momentum, and Ultrafabrics.
