Website tag-chemicals.com/en

Profile TAG Chemicals started more than 20 years ago. After decades of concentrated efforts and continued growth, TAG developed from a small chemical company into a successful worldwide acting group. TAG is grateful to worldwide partners and worldwide customers which helped with the growth of TAG.
New era, new mission.
TAG commits to seizing the opportunity to develop new chemical solutions.
TAG takes chemical and technical innovation as the core pillars and invests into high-end manufacturing facilities and equipment.
TAG promises to offer efficiency and more innovative solutions to confirm our slogan "Technology That Delivers “. Innovation is our assurance for a bright future.
TAG Chemicals GmbH, a branch of the TAG Group, provides turnkey process fluids across many manufacturing sectors.

We pride ourselves on our ability to develop, produce and market a wide range of specialty release agents, additives and lubricants.

TAG Chemicals GmbH is committed to partnering with our clients to provide the best possible products and support for all your process fluid needs.
TAG Chemicals GmbH products can have a dosage reduction of up to 5% compared to competitors, but as we always say, the best way to verify this is by conducting industrial tests, because from factory to factory there are differences in resins, wood, processes and machines, which cause differences in performance from one factory to another, but in general, TAG products meet the production of these materials perfectly well, it is all a matter of testing and making the necessary fine adjustments, which may vary according to the results obtained and desired by the customer.
It may seem like a small amount, a dosage/consumption reduction of up to 5% will increase if we add the taxes and custom duties paid, and at the end of the year, the volume of product and money is quite significant.
Our additives, when used by MDF/MDP to the painting industry, have already been proven by some of our customers that there is a reduction of up to 10% in paint consumption for painting the surface of the boards.
In paper impregnation, things work the same way, but we generally achieve a reduction in consumption / dosage of up to 10% compared to our competitors. Once again, it is particularly important to be able to conduct industrial tests, so that we can evaluate the dosages and results obtained, comparing them with the results needed and desired by our customers.
TAG Chemicals GmbH's additives for the manufacture of MDF/MDF/OSB, are products widely used in Europe, USA and South and Central America, by leading companies in the market, such as Kronos, Kronospan, Ikea, Kastamonu, Arauco, LP Brazil and LP Chile, Novopan Ecuador and others.

Country Egypt

Stand **A-04**

Email elmiascp@gmail.com

Profile Al Elmia for Chemical Industries & Adhesives is a leading manufacturer of chemical products and adhesives, established in 1996. With more than two decades of experience, we have built a strong reputation for reliability, consistency, and technical expertise in the industry.

We export our products to customers across the Arab world and Africa, serving a diverse range of industries and markets. Our commitment to excellence has made us a trusted partner for distributors, manufacturers, and business clients across the region.

Partners in the Furniture Industry

We are proud to be a strategic partner in the growth of the furniture industry, working to develop the sector and raise the quality of its products. We supply specialized furniture manufacturers, including those that export to European markets and to customers around the world, with adhesives and chemical solutions that meet the demands of international standards and help our partners deliver outstanding finished products.

What Sets Us Apart
Superior Quality: Every product is manufactured to the highest quality standards to ensure dependable performance.
Competitive Pricing: We offer the best value in the market without compromising on quality.
Premium Raw Materials: We carefully select high-grade raw materials to guarantee durability and consistency across every batch.
Regional Reach: Established export experience across Arab and African markets.
Furniture Industry Expertise: Dedicated supply to furniture manufacturers serving export markets in Europe and worldwide.
Our Mission

To deliver high-quality chemical and adhesive solutions at competitive prices, while supporting the development of the furniture industry and building long-term partnerships based on trust, quality, and customer satisfaction.

El Hoda for Import & Export

Country Egypt

Stand **A-04**

Email elhodahimex@gmail.com

Profile El Hoda Company specializes in importing and supplying everything required for furniture manufacturing, continuously developing its offering to keep pace with the latest trends in the industry. Its goal is to boost furniture exports and provide Egyptians with modern, practical solutions that make their homes more comfortable and their furniture better suited to everyday use.

Our Story

Founded in 2011, El Hoda Company is an extension of the United Company for Import and Supplies, which has been serving the furniture accessories industry since 1988. Drawing on the deep experience of the parent company, the founder established El Hoda with a fresh vision, aligned with the latest developments in contemporary furniture. The company supports furniture manufacturers by supplying the materials and components they need to deliver modern furniture that suits every individual, both in the local market and in exports to many countries.

Exclusive Agent for Leading Brands

El Hoda is proud to be the exclusive agent in Egypt for some of the largest Turkish kitchen accessories brands, including Starx, Meba, and Albatur, as well as the Chinese company Omega, among others.

Our Commitment to Quality

We source every product to European specifications, whether it originates in Europe, Turkey, China, or any other country, ensuring the quality customers expect at a competitive price.

Profile The Malaysian Timber Council (MTC) promotes the Malaysian timber industry in international markets. Established in 1992 on the initiative of the industry and governed by a Board of Trustees appointed by Malaysia's Minister of Plantation and Commodities, MTC works to strengthen the competitiveness, market access and global credibility of the sector.

For buyers in Egypt, North Africa and the Gulf, MTC offers a single point of access to Malaysian manufacturers and exporters of sawn hardwood, plywood, MDF, veneer, mouldings and furniture components. At Cairo WoodShow 2026, MTC welcomes importers, furniture manufacturers and project developers to discuss their sourcing requirements, including species, specifications, grading and certified timber, and to be introduced to suitable Malaysian suppliers.

Pomeranian Timber S.A.

Country Poland

Stand **C-03-2**

Email office@pomeraniantimber.pl

Website pomeraniantimber.pl

Profile

Our manufacturing and trading company was founded in 1990. Ever since its formation Pomeranian Timber's primary goal has been is to achieve and maintain the highest standards for quality of our products. On a yearly basis, we process about 45,000 m3of raw beech and, on a lesser scale, raw ash, oak, sycamore, alder, etc. Our beech sourced from the north of Poland is characterised by a beautiful bright colour and, typically of the species, a very high density.

In the Polish market, we are a major importer of exotic lumber, laminated window and door scantlings as well as other types of exotic wood products. All our suppliers meet the strict criteria of responsible and sustainable exotic wood forestry.

Contrary to other medium and large hardwood sawmills we perform special production, not only the standardized one. Being elastic is our Idée Fix. Therefore, to meet our clients' special needs, we keep a diverse and highly flexible machine park.

The factory and production structure

Pomeranin Timber is a company underlying a combination of tradition and modernity.

To a small extent we are using European Union subsidies for new technologies. in 2012 the European Union grant enabled us to purchase a vacuum drying chamber. Since then we have been able to kiln dry 80mm and up profiles and plank without internal discoloration.

Our production focuses mainly on a beech wood (90 percent of the total yield) and other European deciduous trees. To grade our products we are using two grading systems; American and German.

Since 2003 we have been a licensed producer of Link-N-Lock timber roof support system for mining. We also produce blank pacgeging from beech wood.

Quebec Wood Export Bureau (QWEB)

Country Canada

Stand **E-05E**

Email info@quebecwoodexport.com

Website www.quebecwoodexport.com

Profile

The Quebec Wood Export Bureau - Your gateway to wood products from Quebec, Canada
The QWEB is a non-profit organization created in 1996 whose mission is to develop overseas markets for Quebec wood products as well as ensuring the access of these products to the markets. Today, it has more than 125 exporting companies in different sectors, including hardwoods and value-added hardwoods.

An association close to its members
QWEB notably aims to consolidate existing markets by increasing the international reach of its members and the confidence of foreign customers regarding the commitment of the wood products manufacturers from Quebec.
For QWEB, it is essential that Quebec wood product companies continue their efforts to develop and diversify markets. Supporting market development initiatives and maintaining market access for wood products from Quebec are at the heart of the QWEB mission, but they also carry on its vision of the future for wood products from Quebec, in a world where, we are convinced, this material will occupy a more prominent place. Also, while environmental protection remains an important issue around the world, the environmental performance of wood, especially to tackle climate change, make it a first-class environmental choice in the context of a transition towards a greener economy.
To know more about what QWEB and what its members can offer, visit quebecwoodexport.com.
