

Product Manager Position

Job description

Our value to both prospective and current clients is determined by our ability to deliver services that far exceed what traditional firms provide.

Ideas are not hatched in silos. Our employees are challenged, and ultimately rewarded, based on the quality of their idea generation, successful execution of client-driven projects, and on their ability to work in a collaborative environment.

To achieve our goals we foster a flat organizational structure not simply as a way to facilitate the flow of information and stimulate new ideas, but to better align our processes with that of our clients.

Overview:

Loan Science is looking for a Product Manager The Product Manager is responsible for product planning and execution throughout the product lifecycle, including conceptualizing a business need and the products(s) needed to address it, gathering and prioritizing product and customer requirements, ensuring the requirements are sufficiently defined as to be actionable, validating that software deliverables satisfy the requirements. The Product Manager ensures that the products support the company's overall strategy and goals.

Responsibilities Include:

- Work with company leadership to define the product strategy and roadmap
- Deliver requirements documents with prioritized features and corresponding justification
- Develop and execute user acceptance criteria for release candidates
- Assist in the development, analysis, and testing of new content intellectual property
- Troubleshoot issues as they arise
- Have a high level understanding of technology and databases

- Possess presentation skills that clearly convey product strategy to partners, management, and potential investors, regarding outlines for your plan to achieve objectives and the identification of potential risk and opportunities.
- Serve as a strong advocate of the products.
- Create a user-centered approach
- Meet the customers and understand their needs
- Continually understand our market to drive strategic differentiation and partnership.

Qualifications:

- 2 to 5 years of experience with product management
- Experience leading a product throughout each stage of the lifecycle from ideation to data-driven iterations with an ability to articulate clear hypotheses throughout the experience
- Experience with SAAS and systems based platforms
- Experience with product optimization testing methodologies, particularly multi-variate testing
- Ability to understand and articulate key tradeoffs for the organization in order to drive smart proactive decisions with the executive team
- Excellent written/verbal communication and amazing organizational skills
- Startup experience
- College degree, deep, personal passion for the mission and problem-space

Nice-to-haves

Fintech and/or Edtech experience + data science/big data experience

MBA or MS
