## Our approval process ensures your centre meets the highest quality standards, giving learners access to industry-recognised qualifications

### Approve my course

Bridge the gap between bespoke training and industry trust. Get your courses EAL Approved to provide high-quality learning courses that the industry respects and trusts.

### Recognition for your expertise with EAL Approved

EAL Approved provides certification needed to learners, employers, providers and the wider industry that your training course meets the high standards of a global leader in engineering and advanced manufacturing.

From your first enquiry, you'll be paired with a dedicated Account Manager to guide you through every step of the EAL approved process. Our expert evaluators work alongside you to refine your content, ensuring it hits every learning objective while establishing the robust quality assurance framework required to secure respected EAL endorsement.

## What are the benefits?

### Endorsement from a trusted brand

When your course is EAL Approved, it's backed by a globally recognised institution. We've been setting the standard for training courses in engineering and advanced manufacturing since 1992.

### Best-in-class support

EAL strives to provide service excellence and support to our customers by placing them at the heart of everything we do. We assign a dedicated Account Manager to every client, guiding them from enquiry and application to appraisal and gaining EAL approved status.

### Independent validation

With EAL Approved, you're saying with authority that you offer training courses the industry can trust. We evaluate courses to a rigorous standard set by engineers, for engineering success.

### Dual-branded certification

EAL Approved stamps your course with quality. Our certification portal allows delivery centres to issue dual-branded digital certificates, giving well-earned recognition to the achievements of you and your users.
