Wales 2026-2027

Introduction

EAL is the specialist awarding organisation, end-point assessment organisation and skills partner for the UK's engineering, and manufacturing industries. We work with industry experts to design and maintain our wide range of Engineering & Manufacturing and Building Services Engineering qualifications. We're dedicated to ensuring people and employers have the right skills at the right time to keep up with evolving industry needs, new technologies, and the net-zero transition.

Our qualifications are fine-tuned to the needs of our sectors and are used in schools, academies, colleges, universities, private training facilities, and workplaces across the UK.

Over the past decade, 1.3 million people have embarked on an EAL course.

Dedicated to delivering support to our valued providers throughout Wales.

We worked with Qualifications Wales and City & Guilds to develop the requirements for new national qualifications in Construction & Building Services Engineering. In collaboration with City & Guilds, we are the national provider of a new suite of Construction & Building Services Engineering qualifications in Wales.

We offer Welsh language materials, assessment papers, and support. This includes translated resources and communication options, enabling apprentices, educators and training providers to access our services in their preferred language.

Our qualifications are designed and maintained by an expert team that understands Wales' education landscape and specific industries within the engineering and manufacturing sector.

Dedicated external quality assurers provide advice and support relating to the delivery of our qualifications.

Our technical advisors help educators and training providers get the most out of our qualifications.

Our industry managers help employers design and manage the right portfolio of qualifications for their apprentices.

We collaborate with employers, educators, training providers, and Qualifications Wales to help ensure that apprenticeships align with the skills needs of Wales' industries.
