

Meet the Swiss Army Knife of telecoms testers.

From base-to-battlefield the OneAdvisor 800 Platform will help military techs keep data transmissions running smoothly over fiber, coax, RF or Ethernet.

The OneAdvisor 800 from VIAVI Solutions, is the most flexible and capable telecoms tester available today. Reduce the amount of kit you need to carry to get the job done. Simplifies and speeds up troubleshooting of RF, cellular, coaxial, and fiber optic networks, as well as spectrum monitoring.

Network Ethernet testing up to 400G, 4G/5G signal analysis, real-time spectrum analysis up to 44 GHz, cable and antenna sweeping, OTDR measurements, timing and sync, built-in remote access, and reporting support.

Rubber-armoured mainframe, with a field replaceable touch screen and integrated stylus for cold weather operations.

One Solution. One Report. OneAdvisor 800.

COAX

Make sure your cable systems are matched and performing correctly for proper power transmission.

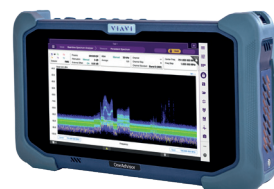

RFoAIR SPECTRUM

Validate RF transmission systems, detect and mitigate interference.

PERSISTENT SPECTRUM REALTIME SPECTRUM ANALYSIS

Find transient or intermittent signals fast. Characterize your electronic signal for Electromagnetic Warfare purposes.

OneAdvisor 800

Field-rugged, modular telecoms test platform for fiber, coax, radio frequency and ethernet.

FIBER

Inspection of connectors and characterization of fiber links with OTDR and insertion loss measurements.

4G/5G ANALYSIS

Over-the-air signal performance testing.

ETHERNET TRANSPORT TESTING

Ethernet/PTP testing up to 400G.

EMF TESTING

Frequency Selective and Code Selective.

CPRI/RFoFIBER

Common Public Radio Interface. Perform RF measurements on fiber-based fronthauls.

RADAR

Improve your probability of intercept with RTSA.

VIAMI Solutions has been delivering industry-leading test for military tactical, life support and airborne radios for more than 50 years, validating all Land Mobile Radio (LMR) technologies worldwide.
