

## Premaster Accounting and Control

Vrije Universiteit Amsterdam - Fac. der Economische Wet. en Bedrijfsk. - P Accounting and Control - 2016-2017

The pre-master programme Accounting & Control consists of 30 ECTS and runs for half a year (February till July). It is a bridge programme that aims to prepare HBO students for studying at a university. Therefore, part of the programme provides training in academic reading, reasoning, and writing, research methodologies and statistics. Part of the programme is intended to make sure that all students have the required knowledge of accounting and related disciplines. Upon successfully completing the pre-master programme you are entitled to enrol in the master programme.

The pre-master programme Accounting & Control is offered to both part-time and full-time students. For most courses, part-time and full-time students take classes together. Where necessary, scheduling of courses and (re-)exams differs between full-time and part-time students in order to allow full-time students to complete the programme within half a year.
