Appendix 2 Evaluation of teaching within the Faculty of Humanities

Course and curriculum evaluations aim to improve the quality of education. The VU draws up questionnaires for this purpose with a number of key questions, which are always asked. In addition, the faculty has the option of adding its own questions to the lists.

Within the Faculty of Humanities, questionnaires are distributed digitally. In this way, the anonymity of students is guaranteed and the Plan-Do-Check-Act (PDCA) cycle - which serves educational improvement - can be run properly.

When the results of the evaluation are ready, the course coordinator is notified. The course coordinator formulates a response to the results of the evaluation and can also report to the students what they are going to change about the course for the next academic year based on the results. Students will have access to a selection of the evaluation results (provided there were at least five respondents) and the course coordinator's response.

The evaluation reports will be available no later than two weeks after the close of the feedback period for the course coordinator. The evaluation results are available to all lecturers of the course, the staff members of the program committee, the program director, and the evaluation coordinator. The program committees present an analysis of the evaluations in their annual report.

Courses to be evaluated

The following criteria are used to designate a module as requiring evaluation:

- Each course is evaluated (at least) once every three years, this means that one third of all courses are covered anyway. This is spread over periods and years so that not all students of one year level are asked to fill in questionnaires each time;
- all newly developed courses / new curriculum;
- courses taught by new teachers;
- all less well evaluated courses from the previous year based on criteria as defined in the Annual Evaluation Plan;
- all courses from university minors offered by faculty;
- courses addressed in the annual plan of the assessment chamber;
- courses put forward at the request of the programme committees;
- courses, with more than 8 students enrolled, that were identified as requiring evaluation in the previous year, but for which there are no evaluation results.

Curriculum Evaluations

The basic principle is that a curriculum is evaluated at least before the start of a midterm review or visitation and after every (thorough) curriculum change. The questionnaires are distributed digitally. The program director may add additional questions to this questionnaire. The period in which the questionnaire is distributed is determined in consultation with the programme director. In addition to the programme committee, the results of curriculum evaluations may be discussed with the work field advisory board.

Other forms of evaluation

Besides digital evaluation, there are other ways to evaluate education. The chapter on Educational Evaluations in the VU's Handbook on Educational Quality provides an overview of qualitative forms of educational evaluation, such as panel discussions, peer review, and quick inventories of strengths and suggestions. These forms of evaluation are encouraged within the faculty.

National Student Survey (NSE)

The Vrije Universiteit participates in the National Student Survey (*Nationale Studenten Enquete*), which is conducted each spring. The NSE can provide useful information about how students experience their program. The annual reports of the programmes reflect on the results of the NSE.

Appendix 4 Honours programme Faculty of Humanities

The Honours Programme is an excellence programme. It consists of 30 additional credits, to be obtained in the second and third year. Of the 30 EC, at least 12 and at most 18 are obtained in the faculty. The remaining credits are obtained from interdepartmental honours courses.

Content and offering in the faculty part

The faculty part comprises in any case:

- Humanities Research Project (12 EC)

In this project the students work individually or in small groups on an ongoing research project after a joint start. Its implementation is defined in consultation with the faculty Honours coordinator, the project coordinator and the researcher(s) involved. The project ends with a joint conclusion (e.g. symposium or publication).

If the student obtains 18 EC in the faculty, they choose a supplementary individual research module (6 EC) in addition to the research project, from the following options:

- Preparing a literature discussion
- Attending a conference and writing a conference discussion
- Archive visit + report
- Contributing to the organization of a conference/graduate seminar + report
- Other contribution to ongoing research

The choice of detailed implementation of one of these options always takes place in consultation with the faculty Honours coordinator and a researcher from the student's own programme.

Interdepartmental Honours Courses

Of the total of 30 EC, 12-18 EC must be obtained by taking interdepartmental courses at the VU, UvA or AUC. You can find the courses here: <https://vu.nl/en/education/more-about/interdepartmental-courses>.

Application

Students can apply by submitting the registration form available on the Honours programme website together with a cover letter and a grade list.

Please see: <https://vu.nl/en/education/more-about/honours-programme-hum>

Appendix 5 Programme objective and exit qualifications

The following attainment goals and objectives of the Bachelor's degree program in Media, Art, Design, and Architecture specify the levels of knowledge, understanding and skills that students are to have reached upon successful completion of the program. These are in line with the Dublin descriptors I to V. The BA program Media, Art, Design and Architecture (MKDA) focuses on the history and theory of media, art, design, and architecture. The program does this from a broad social and cultural-historical perspective, which includes the analysis of the meaning of visual and material culture in our contemporary, multimedia and globalizing society. A combination of courses from the four components within MKDA not only stimulates multidisciplinary and interdisciplinarity of various media but also provides four specializations in total. MKDA intends for students to acquire specialist knowledge of one of the specializations of Media, Art, Design or Architecture over the course of their studies, and to have a vision of the role of visual and material culture in society as a whole. The program aims to train students to become critical experts in the study of images, objects, and space, and how they function in today's society.

The specializations, with regard to objects and genres of research, include:

1. Media: film, television and digital media, ca. 1850 to the present day;
2. Art: visual art (painting and drawing, sculpture, prints, new media), ca. 1400 to the present day;
3. Design: fashion, (applied) arts, typography, graphic design, and living culture, with an emphasis on the period 1750 to the present;
4. Architecture: architecture, living culture, urban design and landscape architecture, ca. 1400 to the present.

I KNOWLEDGE AND INSIGHT [Dublin Descriptor 1]	
1	Students have a level of knowledge of and insight into historical developments and current contexts pertaining to visual and material culture of the Western culture area (from the past and up to today's globalizing world), which allows them to situate works in their context of emergence at both a general level and – regarding their main subject – a detailed level.
2	Students have a level of knowledge of and insight into the production, distribution and reception of objects of visual and material culture, which allows them to deploy this knowledge/insight – supported by careful arguments – for comparing works of MKDA in general and research within their selected main subject in particular.
3	Students have such level knowledge of the western history of visual and material culture from the past and up to our contemporary globalising world that they are capable of productively relating this knowledge to the specializations of MKDA.
4	Students are capable of applying general knowledge about MKDA in order to deepen their knowledge of and insight into the main research methods and frameworks of their selected specialization.
II APPLYING KNOWLEDGE AND INSIGHT / JUDGEMENT [Dublin descriptors 2 and 3]	
5	Students have the competence to analyse objects of research within their selected specialization critically, based on relevant terms and concepts, and to problematize them in a wider and comparative field of visual and material culture.
6	Students are able to consider methods and questions of visual and material culture critically and apply them at a sophisticated level to cases of their selected specialization, whereby they also demonstrate a sound understanding of perspectives and texts in terms of their structure, logic and argumentation.
7	Students are capable of independently performing content-related tasks in a professional context relevant to MKDA – like in a museum, gallery, archive, library, cultural business – and at a third-year MKDA level, such as by conducting

	additional research for an exhibition during an internship or textual research for a publishing house, an educational service or another cultural media institution.
III COMMUNICATION [Dublin Descriptor 4]	
8	Students are capable of clearly presenting – both orally and in writing – a logical and well-supported argument based on their knowledge and skills regarding visual and material culture in general and their selected main subject in particular to fellow-students/scholars and a wider audience but also in specific professional contexts.
IV LEARNING SKILLS [Dublin Descriptor 5]	
9	Students are able to work independently with library catalogues, visual collections and relevant documentation tools (like written and digital repertories and lexicons), in a way that allows them to gather useful data for developing a research question tied to their main subject's required level.
10	Students are capable of developing a scholarly problem critically and independently in a written text of some 7000-10,000 words (excluding notes, list of references and possible annexes) under supervision of a qualified staff member.
11	Students have the proper learning skills for using their acquired theoretical and practical knowledge about visual and material culture in a follow-up curriculum at the (Research) Master level, or for entering a profession for which the BA level in either their selected main subject or an interdisciplinary combination of MKDA-degree trajectories suffices.
12	Students developed a basic sense of a variety of professional fields relevant to their selected main subject and have basic knowledge about the interrelated professional institutions.
