Part A: Faculty section

Bookmarker:

In case a student decides to submit a complaint and/or appeal (against) a decision made by (e.g. a lecturer, administration or a committee) relating to the provisions stipulated in this TER, all information concerning the complaints procedure can be found on the website of the study programme.

1. General provisions

Article A-1.1 Applicability of the Regulations

1. These Teaching and Examination Regulations (hereinafter: these Regulations) apply to the teaching and examinations for the Master's degree programmes (hereinafter referred to as: the degree programme) provided by the Faculty of Sciences (FNWI) (hereinafter referred to as: the faculty) of the University of Amsterdam(UvA):
 - Artificial Intelligence
 - Biological Sciences
 - Biomedical Sciences
 - Brain and Cognitive Sciences
 - Chemistry¹
 - Computational Science¹
 - Earth Sciences
 - Forensic Science
 - Information Studies
 - Life Sciences
 - Logic
 - Mathematics
 - Mathematical Physics
 - Physics and Astronomy¹
 - Security and Network Engineering
 - Software Engineering
 - Stochastics and Financial Mathematics(hereinafter referred to as: the degree programme).
2. These Regulations consist of a faculty section (A) and a programme-specific section (B). Section A contains general provisions and applies to the teaching and examinations of the Master's degree programmes of the faculty. Section B contains programme-specific provisions. Together, Sections A and B form the Teaching and Examination Regulations for the programme.
3. The Regulations can be declared to apply equally to the joint degree programmes and components referred to in Section 7.3c of the Dutch Higher Education and Research Act (WHW) that are co-organised by the faculty.
4. These Regulations apply to anyone enrolled in (components of) the programme, irrespective of the academic year in which the student was first enrolled in (components of) the programme.
5. Section B of these Teaching and Examination Regulations may contain additional general provisions for the relevant degree programme.

¹ This programme is provided by the Vrije Universiteit Amsterdam and the University of Amsterdam

Article A-1.2 Definitions

The following definitions are used in these Regulations:

- a. academic year: the period beginning on 1 September and ending on 31 August of the following calendar year;
- b. Admissions Board: the committee that assesses, on behalf of the dean (UvA), whether a candidate meets the requirements for admission to the Master's degree programme of his/her choice. If there is no Admissions Board appointed for the degree programme, the Examinations Board (within the meaning of Section 7.12 of the WHW) functions as Admissions Board;
- c. COBEX: Examination Appeals Board (Dutch: College van Beroep voor de Examens);
- d. component: a unit of study of the programme assessed by means of an examination;
- e. course catalogue: the guide for the degree programme that provides the provisions and other information specific to that programme, including general information about the courses. The course catalogue is available electronically at <http://studiegids.uva.nl/> ;
- f. course manual: document that provides the details of the component-specific provisions and other component-specific information. The course manual will be made available to registered students before the start of the course;
- g. EC (European Credit): a credit with a workload of 28 hours of study;
- h. examination: an assessment of the student's knowledge, understanding and skills relating to a component. The assessment is expressed in terms of a final mark. An examination may consist of one or more interim examinations. A resit always covers the same material as the original examination. A written examination can be taken on paper or digitally;
- i. examiner: the person appointed by the Examinations Board for the purpose of holding examinations and determining their results, within the meaning of Section 7.12c of the WHW;
- j. Examinations Board: the Examinations Board of one or more study programmes of the faculty, within the meaning of Section 7.12 of the WHW;
- k. Executive Board: Dutch: College van Bestuur;
- l. final examination: the final examination of the Master's programme within the meaning of Section 7.3.3 of the WHW;
- m. interim examination: examination which covers a part of the content of a component;
- n. fraud and plagiarism: the student's acts or failures to act which make it wholly or partially impossible to accurately judge his/her knowledge, understanding and / or skills, please see the text of the [Regulations governing Fraud and Plagiarism](#);
- o. joint degree: a degree awarded by an institution together with one or more institutions in the Netherlands or abroad, after the student has completed a degree programme (a degree programme, a major or a specific curriculum within a degree programme) for which the collaborating institutions are jointly responsible;
- p. master's thesis: (a) component(s) consist(s) of literature research and / or a contribution to scientific research, always resulting in a written report;
- q. period: a part of a semester;
- r. practical exercise: the participation in a practical training or other educational learning activity, aimed at acquiring certain (academic) skills. Examples of practical exercises are:
 - researching and writing a thesis or literature review;
 - carrying out a research assignment;
 - taking part in fieldwork or an excursion;

- taking part in another educational learning activity aimed at acquiring specific skills;
 - participating in and completing a work placement (internship) or research project;
 - preparing an assignment, paper, project or prototype;
 - conducting a design or research assignment;
 - conducting a literature review;
 - conducting assignments independently;
 - carrying out practical work;
 - conducting tests and experiments.
- s. programme the totality and cohesion of the course components, teaching activities / methods, contact hours, testing and examination methods and recommended literature;
- t. semester the first (September – January) or second (February – August) half of an academic year;
- u. SIS: the Student Information System of the UvA;
- v. thesis: a component comprising literature research and/or a contribution to scientific research, always resulting in a written report;
- w. university the University of Amsterdam;
- x. workload the workload of the components to which an interim examination applies, expressed in terms of credits = EC. (The workload for 1 year (1,680 hours) is 60 EC);
- y. WHW the Dutch Higher Education and Research Act (Wet op het hoger onderwijs en wetenschappelijk onderzoek, WHW). The other terms have the meanings ascribed to them by the WHW.

2. Previous education and admission

Article A-2.1 Previous education

1. In order to qualify for enrolment in a Master's degree programme, a Bachelor's degree obtained in academic higher education (WO) is required. The requirements that the Bachelor's degree must meet are specified in section B.
2. In the event that a candidate does not have a Bachelor's degree as referred to in paragraph 1, the Admissions Board of the degree programme will assess suitability for admission to the programme on the basis of the requirements stipulated in section B.
3. In order to qualify for enrolment in a Master's degree programme for teaching in pre-university education, the individual concerned must have been awarded the Master's degree in the relevant subject area, pursuant to Section 7.10a of the WHW.

Article A-2.2 Registration and enrolment

1. The deadline for registering for the Master's programme is stipulated in Article B-3.4 of section B.
2. After registering on time, the student must enrol before 1 September or, if applicable, before 1 February.

Article A-2.3 Faculty Admissions Board

The dean will establish one or more Admissions Boards. The dean will appoint its members after consultation with the programme directors and Examinations Boards of the relevant degree programmes.

Article A-2.4 Admissions procedure

1. The Admissions Board is responsible for admission to the programme.
2. With a view to admitting students to the programme, the Admissions Board assesses the candidate's knowledge, understanding and skills. The Board may request experts within or outside the University to test certain types of knowledge, understanding and skills, in order to supplement written evidence of the programme/programmes the student has already completed. In its assessment, the Board includes knowledge of the language in which the programme will be taught.

3. Candidates receive either confirmation of admission or a negative decision with substantiation. An appeal against a negative decision can be lodged with the Examination Appeals Board (COBEX) within six weeks. The candidate shall be informed of the option to appeal to the Examinations Appeals Board.

Article A-2.5 Refusal or termination of enrolment (*unsuitability/judicium abeundi*)

1. Based on the provisions of Section 7.42a of the WHW, the dean or the Examinations Board may, in exceptional cases, ask the Executive Board to terminate or refuse a student's enrolment in a programme, if that student's actions or remarks show that he/she is unsuitable either for practising one or more of the professions for which the programme in question is preparing the student or for the practical preparation for professional practice.
2. If a student is suspected of being unsuitable as described in paragraph 1, the Examinations Board or the dean will institute an inquiry, of which the student will be informed immediately. The Examinations Board or the dean will not issue any recommendation without carefully considering the interests involved and giving the student the opportunity to be heard.

3. Degree programme structure

Article A-3.1 Structure of academic year

1. The degree programme shall be provided in a semester structure as outlined in the Decision on the Academic Calendar.

Article A-3.2 Organisation of the programme

1. The programme comprises the components included in section B.
2. The size of the degree programme in EC is stipulated in section B.
3. The programme is made up of a compulsory part and a Master's Thesis, academic work placement (internship) or research project and, if applicable, a subject-specific optional component as specified in more detail in section B.
4. The compulsory attendance of a component of an educational programme is laid down in the course catalogue or course manual. Compulsory components may be stipulated in section B.
5. Further conditions with regard to registration for participation in a component, if applicable, are described in section B.

4. Examinations

Article A-4.1 Signing up for programme components and examinations

1. Every student must sign up to participate in components in the Master's programme, if registration is required for participation. Signing up may only take place in the designated periods. The procedure for signing up is described in the course catalogue. Participation in the examination may be refused if the student does not sign up.
2. By way of exception to the provisions of paragraph 1, any student who has correctly signed up for participation in the instruction/classes for a particular course and has been admitted will also be signed up for the subsequent examination and, where applicable, the resit, unless stipulated otherwise in section B.
3. If a student does not pass the examination and the resit of a component, he/she is obliged to take the whole component again.
4. In addition to paragraph 3: This provision does not apply for a number of degree programmes in which certain marks remain valid (which implies that certain educational components need not be followed again). For which exams this applies is described in section B of the degree programme.
5. If a student decides to quit the course, the student must withdraw for the component via SIS.
6. Every student has the right to participate in all programme(s) provided by the university where he/she is registered, on condition that he/she meets the requirements for previous education, entry qualification(s) for a component concerned, and there is no limited programme capacity for the component concerned.

Article A-4.2 Type of examination

1. Section B stipulates the way in which a component is concluded and the form any examination will take.
2. At the student's motivated request or at the examiner request with approval from the student, the Examinations Board may permit a different form of examination than that stipulated in the course catalogue. If applicable, more detailed regulations on this are included in the Rules and Guidelines for the Examinations Board.
3. Where a component is no longer offered, Section B will include a transitional arrangement.
4. The remaining procedures for examinations and the guidelines and instructions for the assessment and determination of test and examination results are described in the Rules and Guidelines of the Examinations Board.
5. In the case of components including a written examination, the student will be entitled to receive sample questions and information about the actual written examination in form and level, preferably in the form of an example examination.

Article A-4.3 Oral examinations

1. Unless otherwise specified for the relevant component in section B, no more than one student will be examined orally at the same time.
2. An oral (interim) examination is public unless the Examinations Board determines otherwise in an exceptional case. A student may submit a reasoned request to the Examinations Board to depart from the public nature of the oral examination. The Examinations Board will balance the interests of the student against the interests of a public examination.
3. An oral examination will be taken in the presence of a second examiner or an audio recording will be made of the examination.

Article A-4.4 Determining and announcing results

1. The examiner determines the result (= mark) of a written examination as soon as possible, but at the latest within fifteen working days. Contrary to the provisions of the first sentence, the marking deadline for theses and final assignments as research projects is no longer than twenty working days.
The examiner submits the necessary information to the Programme Administration and the Programme Administration will then immediately ensure that the marks are registered. The Programme Administration also ensures that the student is notified of the mark within five working days, taking due account of the applicable confidentiality standards. The examiner does not publish results for which the grades are traceable to the individual student.
2. The examiner determines the result (=mark) of an interim examination in any event no later than ten working days after the interim examination has been held.
3. The examiner determines the result of an interim examination no later than five working days before the next (interim) examination will be held.
4. In case of a conflict paragraph 3 prevails over paragraph 2.
5. The examiner determines the result (= mark) of an oral examination within a day the examination has finished and informs the student accordingly. The third sentence of the first paragraph applies.
6. In the case of alternative forms of oral or written examinations, the Examinations Board determines in advance how and by what deadline the student will be informed of the results, however, this deadline shall not be longer than twenty working days.
7. Together with the result of an examination, the student's attention will also be drawn to their right to inspect the assessed work and have a post-examination discussion as stipulated in Articles A-4.9 and A-4.10, as well as his/her option to appeal to the Examinations Appeals Board (Cobex).
8. A student may lodge an appeal against the way in which the result was reached with the Examination Appeals Board within six weeks of the announcement of the result. A request for reassessment can also be submitted to the examiner. A request for reassessment does not suspend the term for the appeal.

Article A-4.5 Resits

1. An opportunity will be offered to resit examinations in the degree programme once in each academic year.
2. Paragraph 1 does not apply in the case of a fail for a practical exercise, a work placement (internship), a research project or a thesis. The options for retaking work placements and theses are detailed in the relevant work placement manual or thesis regulations, or in section B.
3. The most recent mark will apply in the event of a resit.

4. The resit for an examination must not take place within ten working days of the announcement of the result of the examination being resat, unless this is otherwise regulated for specific components in section B.
5. Further conditions with regard to resits are included in section B, where applicable.

Article A-4.6 Marks

1. Marks are given on a scale from 1 to 10. Marks are given with a maximum of one decimal after the point.
2. For final marks only decimals 0 or 5 can be given.
3. The final marks between 5 and 6 (5.5) cannot be given.
4. In cases where the final mark is a weighted average, the final mark is calculated with marks of one decimal after the point.
5. Any final mark of 6.0 or higher counts as passed.
6. In cases where the examination of a component consists of two or more parts, each of which are graded separately, the (weighted) mean of these marks (meaning: the final mark) must be rounded off using the following table:

From	Up to	Grade
1,00	1,25	1
1,25	1,75	1,5
1,75	2,25	2,0
2,25	2,75	2,5
2,75	3,25	3,0
3,25	3,75	3,5
3,75	4,25	4,0
4,25	4,75	4,5
4,75	5,50	5,0
5,50	6,25	6,0
6,25	6,75	6,5
6,75	7,25	7,0
7,25	7,75	7,5
7,75	8,25	8,0
8,25	8,75	8,5
8,75	9,25	9,0
9,25	9,75	9,5
9,75	10,0	10

7. Contrary to the provisions of paragraph 1 till 5 of this Article, a component may be concluded with the 'pass' designation. (In Dutch: aan voorwaarden voldaan, AVV). The names of the relevant components can be found in section B of these Regulations, if applicable.
8. When a student hasn't signed out for a component and hasn't taken the examination or participated in another type of assessment, a no show will be registered.

Article A-4.7 Exemption

1. At the written request of the student, the Examinations Board may exempt the student from taking one or more components, if the student:
 - a. has passed a component at a university or higher professional education programme that is equivalent in both content and level; or
 - b. has demonstrated through his/her work and/or professional experience that he/she has sufficient knowledge and skills with regard to the relevant component.
 - c. Has indicated having conscientious objections.; the Examinations Board decides which requirements must be met.
2. This exemption does not apply to the Master's thesis, the final work placement (internship) or the final research project (in case of programmes where the research project results in the final paper).
3. The Examinations Board will make a decision within twenty working days of receiving the written

request.

Article A-4.8 Validity period for results

1. The dean may decide to limit the period of validity of an examination and granted exemption, if knowledge, understanding and skills are evidently becoming obsolete.
2. In the programme-specific section (Part B) the period of validity of an examination and granted exemption is laid down.
3. Contrary to the rule referred to in paragraph 1, the Examinations Board may extend the limited validity of an examination or exemption, if a student submits a substantiated request to this end.
4. The period of validity of an interim examination is limited to the academic year in which it is taken, or until the conclusion of the component, unless stated otherwise in section B.

Article A-4.9 Right of inspection

1. For twenty working days after the announcement of the results of a written examination, the student can, on request, inspect his/her assessed work, the questions and assignments set, as well as the standards applied for marking. During this inspection the student may take a picture of his/her assessed work provided that the underlying questions are not listed / in the picture.
2. The Examiner can determine that the inspection or post-examination discussion referred to in paragraph 1 take place exclusively at a specified place and at a specified time. The place and time referred to in the previous clause will be announced at the time of the examination and on the digital learning environment (CANVAS).
3. If the student was unable to attend at the place and time referred to in paragraph 2 through no fault of his/her own, an alternative option will be offered.
4. If a student intends to appeal against the way in which his/her mark was assessed, he/she can be issued with a copy of the marked work at his/her request.

Article A-4.10 Post-examination discussion

1. The examiner can organize a post-examination discussion. In this discussion, the examiner deals with the questions of the examination.
2. If a collective post-examination discussion has been organised, individual post-examination discussions will be held only if the student has attended the collective discussion or if he/she was unable to attend the collective discussion through no fault of his/her own.
3. Students who meet the requirements stipulated in the second paragraph can submit a request for an individual post-examination discussion to the relevant examiner. The discussion will take place at a time and location to be determined by the examiner in consultation with the student.

Article A-4.11 Master's final examination

1. The Examinations Board determines the final examination result and the date on which the student obtains his/her degree after it has been established that the student has passed all the components belonging to the programme.
2. A diploma can only be awarded after the Executive Board has declared that the student has satisfied all the procedural requirements, including payment of tuition fees.
3. The rules for conferring the designation of cum laude are set out in the Rules and Guidelines of the Examinations Board.

Article A-4.12 Diplomas and transcripts

1. The Examinations Board grants a diploma as proof that the student has passed his/her final examination. The guidelines for a degree classification (judicium) are listed in the Rules and Regulations of the Examinations Board. The Executive Board sets the model for the diploma. The Examinations Board adds a diploma supplement to the diploma providing information on the nature and content of the degree programme completed. The diploma supplement is drawn up in English and complies with the European format.
2. Individuals who have successfully completed more than one component of the programme and who cannot be awarded a diploma as stipulated in paragraph 1 will, on request, receive a statement to be issued by the relevant Examinations Board stating at least the components that have been successfully completed together with the components they involved, the number of EC obtained and the way in which the examinations were taken.
3. The student can, without needing to provide reasons, request that the Examinations Board not proceed to award a diploma, unless the student him-/herself submitted the request for its issue.

Article A-4.13 Fraud and plagiarism

1. The provisions of the Regulations governing Fraud and Plagiarism for UvA Students (and additions in the Rules and Guidelines for the Examinations Board) apply in full.
2. Electronic detection software programs may be used to detect plagiarism in texts. In submitting a text, the student implicitly consents to the text being entered into the database of the detection program concerned.

5. Study supervision and study progress

Article A-5.1 Administration of study progress and academic student counselling

1. The dean is responsible for the correct registration of the students' study results in SIS. After the assessment of an examination component has been registered, every student has the right to inspect the result for that component via SIS and also has a list of the results achieved at his/her disposal in SIS.
2. Enrolled students are eligible for academic student counselling. The types of academic student counselling available are described in section B.

Article A-5.2 Adaptations for students with a disability

1. A student with a disability can qualify for special adaptations with regard to teaching, practical training and interim examinations. Therefore the student should receive a recommendation provided by a student counsellor. These adaptations will accommodate the student's individual disability as much as possible, but may not alter the quality or degree of difficulty of a course or an examination. In all cases, the student must fulfil the exit qualifications for the degree programme.
2. The request referred to in the first paragraph must in part be based on a recent statement from a physician or psychologist. In case of dyslexia a (written) statement is required, provided by The Dutch Association of Psychologists (in Dutch: NIP), BIG-, and/or certified Association of Educationalists-agency (in Dutch: NVO). In the case of a chronic disability the foregoing recommendation need only be provided once.
3. The dean or, on its behalf, the College/Graduate School director or the education programme director decides on the adaptations concerning the teaching facilities and logistics. The Examinations Board will rule on requests for adaptations with regard to examinations.
4. A request for adaptations will be rejected if it would place a disproportionate burden on the organisation or the resources of the faculty or university were it to be upheld.
5. In the event of a positive decision in response to a request as referred to in paragraph 1, the student will make an appointment with the study adviser to discuss the details of the provisions.
6. If the disability justifies an extension to the exam time, and/or other facilities the student counsellor will issue a statement testifying to this entitlement to an extension and/or facility.
7. The statement referred to in paragraph 6 is valid the whole period of study.

6. Teaching evaluation

Article A-6.1 Teaching evaluation

The teaching evaluation will take place in the manner determined in section B.

7. Hardship clause

Article A-7.1 Hardship clause

In instances not regulated by the Teaching and Examination Regulations or in the event of demonstrable extreme unreasonableness and unfairness the dean responsible for the degree programme will decide, unless the matter concerned is the responsibility of the Examinations Board.

Artikel A-7.2 Calamity

The educational programme director attempts to limit possible negative effects on study progress of a student(s) as a consequence of calamity.

8. Transitional and final provisions

Article A-8.1 Amendments and periodic review

1. Amendments to section A of the Teaching and Examination Regulations will be adopted by the dean with due observance of the regulations pursuant to Section 9.5 of the WHW, as adopted by the Executive Board in relation to section A, and with due observance of the relevant authorities of the representative advisory bodies.
2. An amendment to the section A of the Teaching and Examination Regulations can only pertain to an academic year that is already in progress if this does not demonstrably damage the interests of students.

Article A-8.2 Transitional provisions

1. Contrary to the provisions of the applicable Teaching and Examination Regulations, students who started their degree programmes under previous Teaching and Examination Regulations will be subject to the transitional arrangements outlined in Section B.

Article A-8.3 Publication

1. The dean will ensure the appropriate publication of sections A and B of these Regulations and any amendments to them.
2. The Teaching and Examination Regulations will be posted on the Faculty website.

Article A-8.4 Entry into force

Section A of these Regulations enter into force with effect from 1 September 2019.

Adopted by the dean on 27 August 27 2019.

Approved by authorised representative advisory body:

- Faculty Student Council, dd July 4th 2019;
- Artificial Intelligence, dd July 15th 2019;
- Biological Sciences, dd July 1st 2019;
- Biomedical Sciences, dd July 8th 2019;
- Brain and Cognitive Science, dd July 1st 2019;
- Chemistry, dd June 27th 2019;
- Computational Sciences, dd July 8th 2019 ;
- Earth Sciences, dd July 2nd 2019;
- Forensic Sciences, dd June 28th 2019;
- Information Studies, dd July 6th 2019;
- Logic, dd July 9th 2019;
- Mathematics, Mathematical Physics & Stochastic and Financial Mathematics, dd July 9th 2019;
- Physics and Astronomy, dd July 5th 2019;
- Software Engineering & System and Network Engineering, dd July 16th 2019.

Part B: Programme specifics

Chapter 1. General Provisions

Article B1.1 – Definitions

In addition to part A, the following definitions are used in part B:

- | | |
|---------------------|--|
| a. Research project | Compulsory internship including master's thesis and colloquium |
| b. Study Plan | An individual study plan for the student's master programme |
| c. Course | Education imparted in a series of lessons or meetings |
| d. Admissions Board | Track-specific committee (track coordinator + VU/UvA staff member) that decides on admission |

Article B1.2 – General information master's programme

1. The Master's programme Physics and Astronomy (CROHO 65016), is offered on a full-time basis and the language of instruction is English.
2. In this document the reader should consider articles referring to the new track names to be applicable to the old tracks as well.
3. The programme has a workload of 120 EC.
4. A component of the programme generally consists of 3 EC or multiples of this number.
5. Within the programme Physics and Astronomy, the following tracks are offered:
 - a. Advanced Matter and Energy Physics
 - b. Astronomy and Astrophysics
 - c. Biophysics and Biophotonics (formerly called Physics of Life and Health)
Students enrolled under the track PLH can graduate until August 31, 2020. Upon graduation, the name of the PLH track will appear on their diploma supplement.
 - d. Gravitation, Astro- and Particle Physics (GRAPPA)
 - e. Science for Energy and Sustainability
 - f. Theoretical Physics
6. In each Master track the student may choose a major or a minor from the list below (see Article B4.1).
 - a. Major Science Communication;
 - b. Major Science in Society;
 - c. Major Teaching;
 - d. Minor Teaching;
 - e. Minor Tesla.
7. The student determines the content of the master's programme in consultation with the track coordinator of the master's programme and according to the rules of Chapter 3. The study programme must be approved by the Examinations Board. For this purpose, a completed Study Plan has to be submitted to the Examinations Board. The student submits this plan, approved by the track coordinator, to the Examinations Board. If the student wants to change the contents of the study programme, the student promptly consults with the track coordinator of the study programme. If this results in a new plan the student submits this plan, approved by the track coordinator, to the Examinations Board.

Article B1.3 – Enrolment

The programme starts at the beginning of the first semester (September). This enrolment date ensures a programme that can be expected to be completed within the official period.

Chapter 2. Aim of the programme and exit qualifications

Article B2.1 – Aim of the programme

1. The general objective of the Master's programme is to provide students with such knowledge, skills, abilities and insight in the field of Physics and/or Astronomy, including the necessary mathematical, experimental, computational and communicative skills, to enable them to work as a professional Physicist or Astronomer, or to become qualified to pursue advanced training as scientific researcher.
2. The programme also aims at furthering the understanding of the position and role of physics and astronomy in the sciences and in society, and to further a social sense of responsibility.
3. The aim of the Master's programme in Physics and Astronomy, is to:
 - a. educate students to become independent academic professionals, through conducting fundamental scientific research as well as working with current scientific knowledge, and applying this knowledge in new and continuously changing practical situations;
 - b. actively stimulate interdisciplinary collaboration in the development of science, based on knowledge in the field of physics/astronomy;
 - c. offer students the possibility to develop skills, knowledge and insight in a specialisation in the field of physics/astronomy, with emphasis on formulating relevant scientific questions and the approach to formulate answers to these questions;
 - d. provide student-oriented education that is of a high, internationally recognised quality;
 - e. offer students the opportunity to gain knowledge and insight in an international setting;
 - f. provide an inspiring academic learning environment, and to offer feasible study specialization programmes to a demanding and heterogeneously composed student population;
 - g. develop the ability in students to convey acquired knowledge to others.

Article B2.2 – Exit qualifications

1. The graduate of the Master's programme Physics and Astronomy:
 - a. has a thorough theoretical and practical knowledge of modern physics/astronomy, including the knowledge of other disciplines required for that purpose;
 - b. has a thorough knowledge of theoretical and/or experimental methods and research experience in at least one sub-area within the physics/astronomy discipline;
 - c. is able to become acquainted with other sub-areas of the physics/astronomy discipline within a reasonable period of time;
 - d. is able to formulate a research plan based on a realistic problem definition within the physics/astronomy discipline;
 - e. is able to analyse and formulate research results and to draw conclusions;
 - f. is able to write a scientific report or an internationally accessible scientific publication and to participate in discussions on (specialised) topics in the field of study;
 - g. is able to consult international professional literature in the relevant sub-areas and to apply the knowledge gained from that;
 - h. is able to apply one's knowledge of physics/astronomy in a broader (multidisciplinary) context;

- i. is employable in those positions for which knowledge and research skills in the field of physics/astronomy are a prerequisite;
 - j. has sufficient knowledge of, and insight in the social role of physics/astronomy to make a sound choice regarding one's own profession, as well as in the exertion of this profession;
 - k. is able to cooperate with other people, to convey knowledge to other people, and to give a presentation both to discipline specialists and to a broader audience.
2. Students selecting an experimental or observational master's programme must be able to independently conduct experiments, or devise observations and the corresponding controls, conducting and evaluating these within a given period of time. In addition, each graduate in the programme curriculum:
 - a. is able to compare and incorporate obtained research results and conclusions within the framework of the results of other scientists;
 - b. is able to form a vision on the development of scientific research in the field of physics/astronomy;
 - c. is able to quantitatively and qualitatively analyse physics/astronomy processes, to incorporate data in existing or new models and to present the results at various levels of abstraction.
3. In addition to paragraph 1 and 2, the student who has completed the track Advanced Matter and Energy Physics has obtained the following track-specific qualifications:
 - a. a well-founded knowledge of the theoretical background behind experimental physics in the sub-disciplines: (hard and soft) condensed matter physics; atomic and laser physics;
 - b. a well-founded knowledge of experimental approaches of relevance in modern research into at least one of the following research fields:
 - i. emergent materials, strongly correlated electron systems and unconventional superconductivity;
 - ii. energy materials and processes for (solar) energy conversion;
 - iii. complex liquids, granular and soft bio-matter;
 - iv. high-precision laser spectroscopy, ultracold quantum gases, quantum information and simulation with ultracold atoms.
 - c. proficiency in applying the theoretical knowledge learned to enable the interpretation of the results from experimental work - executed by the graduate at least in part as an independent investigator able to do guided research - in a research project in a field within or close to those given in section b above.
4. In addition to paragraph 1 and 2, the student who has completed the track Astronomy and Astrophysics has obtained the following track-specific qualifications:
 - a. a well-founded knowledge of experimental or theoretical approaches in at least one of the following research fields:
 - i. X-ray binaries and compact objects
 - ii. Gamma ray bursts and radio transients
 - iii. Exoplanets and planet formation
 - iv. Stars and stellar populations
 - v. Advanced instrumentation
5. In addition to paragraph 1 and 2, the student who has completed the track Biophysics and Biophotonics (formerly called Physics of Life and Health) has obtained the following track-specific qualifications:

- a. a well-founded knowledge of the physics background behind processes on a cellular or organ level
 - b. a well-founded knowledge of experimental or simulation approaches into at least one of the following research fields:
 - i. Novel imaging modalities;
 - ii. Novel therapeutic applications;
 - iii. Cellular biophysics;
 - iv. Organ biophysics;
 - c. proficiency in applying the theoretical knowledge learned to enable the interpretation of the results from experimental work - executed by the graduate at least in part as an independent, principal investigator - in a research project in a field within or close to those given in section b above.
6. In addition to paragraph 1 and 2, the student who has completed the track Gravitation, Astro- and Particle Physics (GRAPPA) has obtained the following track-specific qualifications:
- a. a well-founded theoretical knowledge in particle physics and/or astroparticle physics and/or cosmology;
 - b. a well-founded knowledge of experimental or theoretical approaches in at least one of the following research fields:
 - i. Standard Model and Beyond the Standard Model Physics;
 - ii. Cosmology;
 - iii. Dark Matter;
 - iv. Gravitational Waves and tests of Gravity;
 - v. Cosmic Messengers;
 - vi. (Astro-)Particle Physics Detector R&D.
7. In addition to paragraph 1 and 2, the student who has completed the track Science for Energy and Sustainability has obtained the following track-specific qualifications:
- a. a thorough knowledge of the scientific, technological and societal challenges for our future associated with energy and sustainability problems;
 - b. proficiency in analysing and evaluating the current energy and sustainability problems;
 - c. proficiency in applying the acquired theoretical and practical insights in day-to-day practice at an institution, company or organization, strongly focused on providing scientific solutions to current and future energy and sustainability problems;
8. In addition to paragraph 1 and 2, the student who has completed the track Theoretical Physics has obtained the following track-specific qualifications:
- a. a well-founded and working knowledge of Quantum Field Theory for particle physics as well as many body physics;
 - b. a thorough knowledge of the fundamental aspects in modern statistical physics and condensed matter theory;
 - c. the student is informed about basic theoretical concepts as second quantization, path integrals;
 - d. the student is capable of finding the appropriate theoretical framework for a wide range of physics problems.
9. The exit qualifications of the majors and minors are stated in appendix 3.

Chapter 3. Admission to the programme

Article B3.1 – Entry requirements (TER)

1. Students who have successfully completed the following degrees may be admitted:
 - a. a Bachelor's degree in Physics and Astronomy, in Physics, in Applied Physics, or in Astronomy, awarded by a Dutch University;
 - b. a Bachelor's degree in *Bèta-gamma met een Natuurkunde Major* (Bèta-gamma with a Physics Major), awarded by the University of Amsterdam;
 - c. a bachelor's degree awarded by the Amsterdam University College with a *Science Major, track Physics*, including the courses Electrodynamics, Quantum Physics and Mathematical Methods in Physics;
2. Without prejudice to the provisions of paragraph 1, the Admissions Board may grant admission to the study programme when concluding that the previous education of the candidate is equivalent to the bachelor's degree referred to in paragraph 1.
3. Without prejudice to the provisions of paragraphs 1 and 2 the Admissions Board may grant admission to a student whose previous education does not meet aforementioned requirements for admission to the study programme of a chosen track, when concluding that the candidate is able to meet the admission requirements within a reasonable period of time. At the request of a candidate, and if the Admissions Board has decided additional education feasible, the Admissions Board may draw up a pre-master's programme of maximum 42 EC as an admission requirement. After completion of this pre-master's programme a letter of admission will be issued, exclusively for the stated master's programme and track.
4. Without prejudice to the provisions of paragraphs 1, 2 and 3, when the Admissions Board decides that the additional required education on Bachelor's-level for a candidate is for not more than 12 EC, direct admission to the master programme can be granted. In this case the additional course(s) to be taken by the student will be part of the *free* elective components.

Article B3.2 – Pre-master's programme

1. Holders of a bachelor's degree in a field that sufficiently corresponds with the field of the master's programme may apply for admission to the pre-master's programme. In accordance to Article B3.1 section 3 the Admissions Board may draw up a pre-master's programme of maximum 42 EC. This pre-master's programme may be taught partially in Dutch and partially in English. The programme must be completed in a maximum of 2 years.
2. The possible content of the pre-master's programme is described in paragraph 5a, section B, of the Teaching and Examination Regulations for Bachelor's programme Natuur- en Sterrenkunde. It is also listed in Appendix 2 of this OER B.3. Proof of a successfully completed pre-master's programme shall serve as confirmation of admission to the master's programme specified within it in the subsequent academic year.

Article B3.3 – Restrictions on the number of students admitted to the master's programme

No restrictions

Article B3.4 – Intake dates

A request for admission to the master's programme starting in September must be received before May 1 in the case of non-Dutch EU students, July 1 in the case of Dutch students and before February 1 in the case of non-EU students. Under exceptional circumstances, the Admissions Board may consider a request submitted after this closing date.

Article B3.5 – English Language Requirements

1. The proficiency requirement in English as the language of instruction can be met by the successful completion of one of the following examinations:
 - a. IELTS: 6,5, at least 6 on each sub-score (listening/reading/writing/speaking);
 - b. TOEFL paper-based: 580, paper-delivered at least 22 on each sub-score;
 - c. TOEFL Internet-based test: 92, at least 22 on each sub-score (listening/reading/writing/speaking);
The foregoing examination must have been taken within two years before the student's enrolment.
 - d. C1 Advanced (CAE): minimal result 170 (overall C)
 - e. C2 Proficiency (CPE): minimal result 170 (overall C)
Please note that the TOEFL-code for the University of Amsterdam is 9011
2. An exemption from the English examination referred to in the first paragraph shall be granted to students who:
 - a. have received a diploma in secondary or tertiary education in one of the following English-speaking countries: Australia, Canada (English), New Zealand, Ireland, the United Kingdom or the United States of America;
 - b. hold an English-language 'international baccalaureate' diploma;
 - c. possess a bachelor's degree from a Dutch university satisfying the requirement of sufficient command of the English language;
 - d. passed the final examination for the subject of English as part of one of the following diplomas: VWO, Belgian ASO (Flemish).

Chapter 4. Content and organisation of the programme

Article B4.1 – Organisation of the programme

Depending of the specialization programme the study programme is composed of components according to Table 1.

A complete list of courses provided by the master's programme can be found in Appendix 1. Every component will be tested. Within the master's programme different types of testing and different types of teaching methods are used. These are described per component in the Appendix 1 and in the course catalogue.

Table 1.

Components	Regular programme	Programme with a major	Programme with a minor
Compulsory components for the track	At least 12 EC**		12 EC
Elective components discipline	Max 24 EC**	Total: 24 EC	18 EC
Track specific compulsory project	6 EC		6 EC
Research Project (incl. thesis and colloquium)	60* EC	36 EC	54 EC
Free elective components	12 EC		
Academic skills in the Master	6 EC		
Major or minor programme		60 EC	30 EC
Total EC	120 EC	120 EC	120 EC

* The research project is 60 EC. A different organization of the research project requires permission of the Examinations Board. The research project can be split in maximally 2 projects, 1 project is at least 36 EC. Each project is a multiple of 6 EC. The second research project is at least 18 EC.

** Compulsory courses and restricted-choice electives together must be 36 EC, including at least 12 EC compulsory courses.

1. The student can choose between the regular programme and a programme containing a major or a minor. These are:
 - a. Major Teaching;
 - b. Minor Tesla;
 - c. Minor Teaching;
 - d. Major Science Communication (VU);
 - e. Major Science in Society (VU).
2. Regarding majors:

A major consists of 60 EC. It has to be combined with disciplinary components as listed in table 1, with the general compulsory components in order to meet the general requirements of the programme. Students have to go through a separate intake procedure for admission to a major.
3. Regarding the major Teaching:

Students who have completed an Educative Minor of 30 EC during their bachelor's programme may submit a non-standard study programme for approval to the Examinations

Board of the *Interfacultaire Lerarenopleidingen*, after discussing this non-standard study programme with the coordinator of the major Teaching and the track coordinator of the master's programme. The exit qualifications of the major can be found in Appendix 3. Students first have to finish 48 EC of the obligatory research part of the programme before starting the major Teaching.

4. Regarding the minor Tesla:

The minor Tesla consists of 30 EC. It must be combined with a regular programme, comprising at least 90 EC. The minor consists of a course component and a project-based component. This project-based component has to be supervised by a Faculty of Science examiner and is subject to prior approval of appropriateness to the MSc Physics & Astronomy by the Physics & Astronomy programme director, as well as the Examinations Board. An examiner from the research programme has to be appointed as a second assessor. The learning objectives of this minor can be found in Appendix 3.

Article B4.2 – Compulsory components

The regular programme includes compulsory components with a total study load of at least 12 EC. The contents and format of the compulsory components of the various tracks are listed in Appendix 1 and further described in the Course Catalogue, stating the necessary entry requirements for successful participation in the component.

Article B4.3 – Practical components

1. In addition to, or instead of, classes in the form of lectures, the elements of the master's examination programme often include a practical component as defined in article A1.2 of part A. Appendix 1 contains information on the types of classes in each part of the programme. Attendance during practical components is mandatory.
2. When performing practical components, students must adhere to the faculty's safety regulations.
3. The programme consists of research-related components with a study load of at least 60 EC (36 in the major, 54 in the minor). The research-related components always include the compulsory components: a research assignment of at least 54 EC (30 in the major, 48 in the minor) and a final report and a scientific presentation with a study load of 6 EC.

Article B4.4 – Elective components

1. Students choose components in the field of the discipline with a study load of at least 24 EC in consultation with the track coordinator of the master's programme and according to the rules stated in Appendix 1 and in the Course Catalogue of the study programme. Only after the written approval of the track coordinator at most 12 EC of these components may be chosen from another track.
2. Elective components are considered to be those components in the field of the discipline stated in Appendix 1, and included in the Course Catalogue of the discipline, or of components offered by another Dutch or foreign university, being according to the Examinations Board of a comparable level.
3. Course components successfully completed elsewhere or that are not included in Appendix 1 during the programme may supplement the student's examination programme, subject to prior permission from the Examinations Board.
 - a. The courses have to be followed at an accredited university or institute
 - b. The courses have to be relevant to the master chosen.
4. In exceptional cases, and only after the agreement of the track coordinator, students may choose Bachelor's-level free elective components as part of their programme.

5. In terms of content, elective components must not show too much similarity to other components of the student's curriculum. The acceptable degree of similarity will be decided by the Examinations Board.

Article B4.5 – Free curriculum

The student may compile a curriculum of his/her own choice, which has to be approved by the Examinations Board. The free curriculum must possess at least the extent, breadth and depth of a regular master's programme and must be in line with the learning outcomes of the degree programme. At least one half of the proposed curriculum has to consist of components of the regular programme (see Table 1), including the Research Project.

Article B4.6 – Sequence and admission requirements

1. Participation in a course may be restricted to students that have completed certain other programme components. Information about sequence and admission requirements can be found in the course catalogue.
2. In cases where the result of a component has not been determined within the time periods mentioned in Article A4.4 of part A, this component may not be required as prior knowledge for the subsequent component.

Article B4.7 – Participation practical training and tutorials

Not applicable

Article B4.8 – Exemption

1. At the written request of the student, the Examinations Board may exempt the student from taking one or more examination components, if the student:
 - a. Has passed a component of an academic or higher professional education programme that is equivalent in both content and level;
 - b. Has demonstrated through his/her work and/or professional experience that he/she has sufficient knowledge and skills with regard to the relevant component.
2. This exemption does not apply to the Research Project.
3. Exemptions from examinations (or parts thereof), if granted, will be valid for the same period of examinations.
4. A maximum of 60 EC can be accumulated through granted exemptions.

Article B4.9 – Degree

A student who passes the final examination of a programme is awarded a Master of Science degree. The degree awarded is stated on the diploma.

Article B4.10 – Double Master's Degree Mathematics and Physics and Astronomy/ track Theoretical Physics

1. The candidate must be admitted to both Master programmes.
2. The total study load of the programme of the candidate should amount to at least 180 EC, comprising
 - a. 46 EC Compulsory components
 - b. 72 EC Master Project Mathematics and Theoretical Physics
 - c. 12 EC Restricted- choice electives physics courses
 - d. 38 EC Restricted- choice electives mathematics courses
 - e. 12 EC Free-choice elective courses

3. The candidate has conducted an integrated research project Master Project Mathematics and Theoretical Physics (72 EC), replacing Master Project Mathematics (36 EC) and Research Project Physics and Astronomy (60 EC). This must be supervised by examiners from the two Master's programmes. The project must be assessed as a pass by both examiners according to the standards and procedures for the master's project assessment of the respective master's degrees.
4. The integrated research project of article B4.10, point 3 can be replaced by two separate projects: Master Project Mathematics (36 EC), and Research Project Physics and Astronomy (60 EC). In this case the total load of the programme must be at least 192 EC.
5. The compulsory components are
 - a. Differential Geometry (8 EC, replaces Mathematical Methods from MSc Physics & Astronomy)
 - b. Lie Groups (8 EC, replaces Group Theory from MSc Physics & Astronomy)
 - c. Quantum Field Theory (6 EC)
 - d. Statistical Physics & Condensed Matter Theory 1 (6 EC)
 - e. A joint course in Mathematics and Theoretical Physics (8 EC). In 2019/2020 the course will be Topology in Physics (6 EC).
 - f. Master seminar Algebra, Geometry & Mathematical Physics (6 EC).
 - g. Student seminar Theoretical Physics (6 EC).
6. The restricted-choice elective physics courses consist of 12 EC of physics courses from the MSc Physics & Astronomy, including at least 6 EC from the track Theoretical Physics. The courses Mathematical Methods and Group Theory cannot be taken as part of these 12 EC. The Teaching and Examination Regulations of the MSc Physics & Astronomy contains the list of courses of the MSc Physics & Astronomy, and the sub list of courses from the track Theoretical Physics.
7. The restricted-choice elective courses from MSc Mathematics consist of 38 EC. It includes at least one of the courses Algebraic Topology 1, Algebraic Geometry 1 and Riemann Surfaces and contains two restricted-choice electives from the list of advanced courses of the specialization directions Algebra & Geometry and Mathematical Physics. The Teaching and Examination Regulations of the MSc Mathematics contains the list of restricted-choice elective courses of the MSc Mathematics (appendix 2 TER Mathematics part B), as well as the list of advanced courses in the specialization directions Algebra & Geometry and Mathematical Physics (art. B4.1.2 TER part B Mathematics).

Article B4.11 – Double Master's programme (two-year programmes)

In case a student combines two master's programmes and their components, the following requirements must be met in order to be awarded two master's degrees:

1. The total programme of the candidate should amount to at least 180 ECTS credits. The student follows the Physics and Astronomy Programme with a minor (cf. Table 1) (with 90 EC Physics and Astronomy components) and obtains 30 EC exemptions (instead of the minor) with courses from the other master's programme.
2. The candidate's work for the programme (lectures, research work, etc.) must be of such a standard that all the compulsory requirements of each of the two programmes have been met.
3. The candidate must have conducted separate research work for both master's degrees. This may consist of two separate research projects (incl. thesis and colloquium) with supervisors from the respective study programmes. In the case of an integrated research project, this

must be supervised by two staff members appointed from the two study programmes. Both staff members must assess the work as a pass. The total number of credits given for an integrated research project (incl. thesis and colloquium) is 3/4 of the sum of the credits given for two independent research projects.

4. The Examinations Boards of both study programmes must approve the student's double master's programme before the student commences the double master's programme.

Article B4.12 – Participation in courses and rules for priority admission

1. Every student must enrol for every component. To participate in courses, the student must enrol within the period indicated in Appendix 1 and in the Course Catalogue and according to procedures mentioned there. The student may be refused the opportunity to participate if he/she does not enrol or fails to enrol in time.
2. Admission to courses with limited capacity takes place based on previously established and published admission criteria and rules for priority admission, on the understanding that students enrolled in the programme are given priority over others when enrolling for courses in the compulsory part of their programme.
3. Persons who are not enrolled at the University have no right to participate in teaching and examination activities.

Article B4.13 – Determining results of examination Academic Skills

1. The Academic skills in the Master consist of components with a study load of 6 EC.
2. The student may complete the Academic skills in the Master by participating in the relevant components as described in the Appendix 1 and in the Course Catalogue.

Article B4.14 – Research Project (including master's Thesis and Colloquium)

1. It is mandatory that the student fills out a proposal in datanose (<https://datanose.nl/>), together with the supervisor. The track coordinator and the supervisor evaluate this proposal, and upon approval the student can start the research training. The supervisor is a permanent staff member of the VU or UvA Faculty of Science, appointed as an examiner by the Examinations Board.
2. At the end of the Research Project, the supervisor checks on the basis of the assessment form, if the student has sufficiently achieved the set exit qualifications.
3. For the assessment of the Research Project the advice and judgement of a second examiner is included, who pays particular attention to the structure and quality of the report and the presentation. A second examiner is a staff member of the VU and/or UvA Faculty of Science that is not directly involved with the research project.
4. If the mark for the Research Project is 8 or higher, the supervisor and the second examiner provide the Examinations Board with a written statement explaining their assessment results in more detail and their agreement with a potential Cum Laude.

Chapter 5. Academic student counselling

Article B5.1 – Academic student counselling

The academic student counselling for this programme consists of:

- a dedicated study advisor for all students of the programme.

Chapter 6. Teaching evaluation

Article B6.1 – Teaching evaluation

Teaching evaluation shall take place as follows:

1. Course evaluations with an UvA-Q questionnaire of all compulsory courses, and of courses requested by the Programme Committee (PC);
2. Course evaluations with a VU questionnaire for those courses organized at the VU;
3. Curriculum evaluation of the degree programme and the tracks within the programme;
4. Oral discussion in the Semester Response System (SRS) meetings.

All evaluation reports are discussed within the PC. The PC advises the programme director on the quality of the degree programme.

Chapter 7. Transitional and final provisions

Article B7.1 – Amendments

1. The dean shall establish amendments to the part B of these Regulations by independent decision – having heard the Programme Committee (PC) and with due regard for the authority of the relevant advisory bodies.
2. Amendments to these regulations take place following a recommendation by the PC relating to the regulations in their entirety, and with the endorsement of a joint meeting of those sections which do not relate to the subject of Article B7.13 paragraphs 2a to g, and paragraph 3 of the Act and the admission requirements for Master's programmes.
3. Amendments to the part B of these Regulations do not apply to the current academic year unless they can be reasonably assumed not to damage the student's interest.

Article B7.2 – Cancelled programme components

1. Cancelled courses:
 - a. Academic Skills: Critical Thinking
 - b. Computational Methods
 - c. Computational Methods Extension
 - d. From Genome to Physiome
 - e. Introduction to BV Quantization
2. Course that are not taught in 2019/2020 but are taught again in 2020/2021:
 - a. Computational Astrophysics
 - b. Radio Astronomy
 - c. Space Instrumentation for High-Energy Astrophysics
 - d. Stellar Populations (new course)

3. These courses have changed their name:
 - a. Stellar Atmospheres (old) - Atmospheres and Radiative Transfer
 - b. HEA: Accretion onto Compact Objects (old) - Disks and Accretion
 - c. Star and Planet Formation (old) - Planet Formation and Exoplanets
 - d. HEA: Radiative Processes and Relativistic Flows (old) - Extreme Astrophysics

Article B7.3 – Publication

1. The dean shall ensure a fitting publication of part A and B of these Regulations and the rules and guideline referred to in the Act.
2. These regulations can be accessed at the website of the Faculty.

Article B7.4 – Effective date

These Regulations enter into force with effect from 1 September 2019.

Thus drawn up by the Dean of the Faculty of Science on 27 August 2019.

Appendix 1 Description of the content and study load of the components

This list comprises the curriculum components of the Physics and Astronomy Master's programme tracks in the academic year 2019-2020. The contents of the components are described in the Course Catalogue. The amount of EC required in the schedules below refers to the *Regular programme*. It is different for the *Programme with a major* or the *Programme with a minor*, cf. Table 1.

Schedule track Advanced Matter and Energy Physics

Format: L: lectures; T: tutorials; CP: computer practicum; Lit: literature study;
As: assignment; Exp: experimental work; PW: practical work; PROJ: Project

Assessment: W: written exam; O: oral exam; P: presentation; R: report, PROJ: Project

Course	course code		EC	period	format	assessment
	UvA	VU				
Year 1						
Compulsory: (24 EC)						
AMEP Lab Project	5354AML6Y		6	1-6	Exp	P, R
Emergent Energy Materials	5354EMEM6Y		6	1	L, T	W
Hydrodynamics	5354HYDR6Y	X_428536	6	4	L, T	W, PROJ, As
Quantum Optics	5354QUOP6Y	X_420118	6	2	L, T	W, O
Showcase 1	53541SHO0Y		0	1	L	none
Showcase 2	53548SHO0Y		0	2	L	none
Restricted-choice electives 1: (6 EC required)						
Statistical Physics and Condensed Matter Theory I	53541SPC6Y	X_420083	6	1	L, T	W
Statistical Physics of Soft & Living Matter	5354SPSL6Y		6	4	L, T	P, W
Restricted-choice electives 2: (18 EC required)						
Bose Einstein Condensates	5354BOEC6Y		6	2	L, T	W, O
Fermi Quantum Gases	5354FEQG6Y	X_428514	6	5	L, T	W, O
Mathematica for Physicists	5354MAFP3Y	X_428533	3	3	L, T	PROJ
Nanophotonics	5354NANO6Y		6	5	L, PW	P, O
Organic Photovoltaics	53548ORP6Y	X_422590	6	5	L, Lit	P, R
Photosynthesis and Energy	53548PHO6Y	X_422553	6	5	L, CP	W
Photovoltaics	5354PHVO6Y	X_428516	6	4	L, T	O
Soft and Porous Matter	5354PHAC6Y		6	5	L, T	P, W, As

Academic Skills: (6 EC required)

See Academic Skills list below

Year: 2

Compulsory: (60 EC required)

Research Project Physics and Astronomy 1	5354RPP60Y	36-60	1-6
Research Project Physics and Astronomy 2	53542RP60Y	18-60	1-6

Schedule track Astronomy & Astrophysics

Format: L: lectures; T: tutorials; CP: computer practicum; Lit: literature study;
As: assignment; Exp: experimental work; PW: practical work; PROJ: Project

Assessment: W: written exam; O: oral exam; P: presentation; R: report, PROJ: Project

Course	course code		EC	period	format	assessment
	UvA	VU				
Year 1						
Compulsory: (9 EC)						
Astrophysics Colloquium	5214ASCO0Y		0	1-6	L	none
Open Problems in Modern Astrophysics	5354OPIM3Y		3	1	L, T	W, R, O
Statistical Methods for the Physical Sciences	5354SMFT6Y		6	3	L, T	R, O
Restricted-choice electives 1 (18 EC required)						
Atmospheres and Radiative Transfer	5214STAT6Y		6	1	L, T	W
Disks and Accretion	5214HAOC6Y		6	2	L, T	W
Extreme Astrophysics	5354EXAS6Y		6	4	L, T	W
Structure and Evolution of Stars	5214STES6Y		6	2	L, T	W, R, P
Restricted-choice electives 2 (18 EC required)						
Astronomical Interferometry	5354ASIN6Y		6	5	L, T	W, R
Astroparticle Physics	5354ASPH6Y		6	4	L, T	W
Astrovaria	5214ASTR6Y		6	1-6	PROJ	R, O
Basic Linux and Coding for AA	5214BLCF3Y		3	1	L, CP	W
Cosmology	5214COSM6Y		6	2	L, T	W
Fluid Dynamics (this course may not be taught in 19/20)	5214FLDY6Y		6	5	L, T	W, P
General Relativity	5354GERE6Y		6	1	L, T	W, O
GRAPPA Student Seminar	5354GRSS6Y		6	6	L	P, R
Gravitational Waves	5354GRWA3Y		3	5	L, T	W
Observation Project	5214OBPR6		6	1,6	PROJ	R
Particle Physics I	53541PAP6Y		6	1	L, T	W
Planet Formation and Exoplanets	5214STPF6Y		6	4	L, T	W
Academic Skills: (3 more EC required in addition to Open Problems in Modern Astrophysics)						
See Academic Skills list below						
Year 2						
Compulsory: (60 EC required)						
Research Project Physics and Astronomy 1	5354RPP60Y		36- 60	1-6		
Research Project Physics and Astronomy 2	53542RP60Y		18- 60	1-6		

Schedule track Biophysics and Biophotonics (formerly called Physics of Life and Health)

Format: L: lectures; T: tutorials; CP: computer practicum; Lit: literature study;
As: assignment; Exp: experimental work; PW: practical work; PROJ: Project

Assessment: W: written exam; O: oral exam; P: presentation; R: report, PROJ: Project

*this course can be 3 EC or 6 EC. The 6 EC course should be approved by the Examinations Board before the start of your project. Two individual projects of 3 EC should be approved by the Track Coordinator before the start of your projects.

Schedule Physics Majors and Minors

Major Science in Society

The Master's graduate with a specialization Science in Society combines an academic approach with the skills and competences that will allow him or her to perform scientific research at the interface of the biomedical sciences and society. The specialization aims to develop strategies that contribute to an understanding of complex societal problems and strategies to solve complex societal problems through interdisciplinary research. In addition, the programme analyses the social, economic and ethical aspects of new developments in the biomedical sciences, so as to assess their implications for society. Master's graduates have the necessary skills to collaborate and communicate with researchers from various scientific disciplines (including but not limited to those in the life sciences) and societal actors, and the ability to use these academic insights.

More information of the majors and minors can be found on <https://student.uva.nl/phys-astro/shared/studentensites/fnwi/ew-gedeelde-content/en/az/majors-and-minors/majors-and-minors.html>

Major Science Communication

Communication about science takes place between academic peers and between scientists and the general public. This makes the Communication specialization a complex and dynamic field of research and practice, for example on patient participation in health research, the use and effects of media metaphors and hype, and public understanding of emergent technologies. The Master's graduate with this specialization has a theoretical understanding of the complex problems that arise during such communication processes and has developed the necessary skills to act professionally at this interface to enhance communication and the outcomes of communication between scientific actors and society.

More information of the majors and minors can be found on <https://student.uva.nl/phys-astro/shared/studentensites/fnwi/ew-gedeelde-content/en/az/majors-and-minors/majors-and-minors.html>

Major Teaching

Courses are taught in Dutch.

Met de opleiding wordt beoogd studenten op te leiden tot Leraar Voorbereidend Hoger Onderwijs. De opleiding combineert het ambachtelijke met het academische: studenten ontwikkelen een stevige kennisbasis en een onderzoekende houding in het vak en beroep, en staan tegelijkertijd met twee benen in de praktijk waar ze het 'ambacht' leren. Studenten worden opgeleid tot teamwerkers die initiatief nemen en draagvlak zoeken, en die zichzelf én een rolmodel voor leerlingen durven te zijn. Zij zijn gericht op innovatie en dragen actief bij aan het creëren van nieuwe kennis en aan schoolvak- en onderwijsontwikkeling.

More information of the majors and minors can be found on <https://student.uva.nl/phys-astro/shared/studentensites/fnwi/ew-gedeelde-content/en/az/majors-and-minors/majors-and-minors.html>

Appendix 2 Courses for the pre-master's programme

As explained in §3.1.2 the Admissions Board may draw up a pre-master's programme of maximum 42 EC. The pre-master's programme consists of a selection of the components from the table below. Depending upon the track, courses from the top five rows are compulsory. Courses with Dutch names will be taught in Dutch, the other courses will be taught in English.

Format: L: lectures; T: tutorials; CP: computer practicum; Lit: literature study;
As: assignment; Exp: experimental work; PW: practical work; PROJ: Project

Assessment: W: written exam; O: oral exam; P: presentation; R: report, PROJ: Project

Appendix 3 Final attainment levels of the Major Teaching, and learning objectives minor TESLA and the minor Teaching

Final attainments levels of the Major Teaching

De bekwaamheidseisen Leraar Voorbereidend Hoger Onderwijs zijn, naast de voor alle wo-masteropleidingen geldende Dublin-descriptoren en algemene wettelijke eisen, richtinggevend voor de doelstellingen en eindtermen van de lerarenopleidingen Voorbereidend Hoger Onderwijs. Deze bekwaamheidseisen zijn vastgelegd in de Wet op het voortgezet onderwijs (artikel 36 e.v.) en het Besluit bekwaamheidseisen onderwijspersoneel (zie 'Besluit bekwaamheidseisen onderwijspersoneel' (<http://wetten.overheid.nl/BWBR0018692/2017-08-01>) en 'Besluit van 16 maart 2017 tot wijziging van het Besluit bekwaamheidseisen onderwijspersoneel en het Besluit bekwaamheidseisen onderwijspersoneel BES in verband met de herijking van de bekwaamheidseisen voor leraren en docenten' (<https://zoek.officielebekendmakingen.nl/stb-2017-148.html>)).

De eindtermen zijn geordend in twee categorieën:

- Eindtermen die rechtstreeks te maken hebben met de kern van het beroep: het onderwijsleerproces en het leren van leerlingen, te weten de vakinhoudelijke, vakdidactische en pedagogische bekwaamheid (eindterm 1 t/m 3).
- Eindtermen die betrekking hebben op meer algemene aspecten van professioneel handelen ten dienste van die kern van het beroep: te weten samenwerking met collega's en de omgeving van de school en met reflectie en persoonlijke en professionele ontwikkeling (eindterm 4 t/m 5).

De opleiding draagt er zorg voor dat de afgestudeerde Leraar VHO in ieder geval:

1. aantoonbaar beschikt over vakinhoudelijke kennis en vaardigheden die het wo-bachelorniveau overstijgen dan wel verdiepen. Dat wil zeggen dat de afgestudeerde eerstegraads leraar:
 - a. de inhoud van vak beheerst / boven de leerstof staat;
 - b. daardoor de leerstof, voor het schooltype waarin hij werkzaam is, zo kan samenstellen, kiezen of bewerken dat zijn leerlingen die kunnen leren;
 - c. vanuit zijn vakinhoudelijke expertise verbanden kan leggen met het dagelijks leven, met werk en met wetenschap en het onderwijs betekenisvol kan maken voor de leerlingen;
 - d. daarmee kan bijdragen aan de algemene vorming van zijn leerlingen.
2. aantoonbaar beschikt over vakdidactische kennis en vaardigheden. Dat wil zeggen dat de afgestudeerde Leraar VHO:
 - a. de vakinhoud weet te vertalen in leerplannen of leertrajecten en dat doet op een professionele, ontwikkelingsgerichte werkwijze;
 - b. de vakinhoud leerbaar maakt voor en afstemt op het niveau en kenmerken van zijn leerlingen, daarbij doelmatig gebruikmakend van (digitale) beschikbare leermiddelen;
 - c. het onderwijs kan ontwikkelen en evalueren;
 - d. het onderwijs doelmatig kan uitvoeren en het leren van leerlingen kan organiseren;
 - e. de vak inhoud/didactiek afstemt met zijn collega's en laat aansluiten bij de visie en missie van zijn school.

3. aantoonbaar beschikt over pedagogische kennis en vaardigheden. Dat wil zeggen dat de afgestudeerde Leraar VHO:
 - a. de ontwikkeling van zijn leerlingen volgt in hun leren en gedrag en daarop zijn handelen afstemt;
 - b. bijdraagt aan de sociaal-emotionele en morele ontwikkeling van zijn leerlingen;
 - c. bijdraagt aan de burgerschapsvorming en de ontwikkeling van de leerling tot een zelfstandige en verantwoordelijke volwassene;
 - d. met een professionele, ontwikkelingsgerichte werkwijze en in samenwerking met zijn collega's een veilig, ondersteunend en stimulerend leerklimaat voor zijn leerlingen kan realiseren;
 - e. in staat is om oordelen te formuleren, rekening houdend met de sociaal-maatschappelijke en ethische verantwoordelijkheden die horen bij het beroep.
4. aantoonbaar reflecteert ten behoeve van persoonlijke en professionele ontwikkeling. Dat wil zeggen dat de afgestudeerde Leraar VHO:
 - a. in staat is kritisch te reflecteren op alle aspecten die met zijn persoonlijkheid, zijn motivatie, attitudes, verwachtingen en cognities te maken hebben (die onder meer tot uiting komen in het pedagogisch handelen) en feedback hieromtrent ter harte te nemen
 - b. op onderzoeksmatige wijze de (eigen) onderwijspraktijk verbetert en blijft ontwikkelen;
 - c. zijn (vak)kennis en -kunde actueel houdt;
 - d. in staat is zijn eigen positie te bepalen ten aanzien van de missie en visie van de school/instelling waar hij werkzaam is en bereid is een constructieve bijdrage te leveren aan de ontwikkeling van zijn vak/het onderwijs in de school.
5. aantoonbaar samenwerkt en communiceert met collega's en omgeving. Dat wil zeggen dat de afgestudeerde Leraar VHO:
 - a. zijn pedagogisch handelen kan afstemmen met zijn collega's en met anderen die voor de ontwikkeling van de leerling verantwoordelijk zijn;
 - b. de ontwikkeling van zijn vak/curriculum in de school kan afstemmen met zijn collega's en met anderen die voor de ontwikkeling van de leerling verantwoordelijk zijn.
6. Onverminderd het bepaalde in lid 1 heeft de afgestudeerde van afstudeerrichting Biologie een gedegen vakinhoudelijke kennis van en inzicht in het vakgebied en de vakdidactiek van Biologie en kan op basis daarvan aantrekkelijke, effectieve en efficiënte leeractiviteiten ontwerpen, uitvoeren, begeleiden en evalueren voor het schoolvak Biologie in de onderbouw en/of bovenbouw.
7. Onverminderd het bepaalde in lid 1 heeft de afgestudeerde van afstudeerrichting Natuurkunde een gedegen vakinhoudelijke kennis van en inzicht in het vakgebied en de vakdidactiek van Natuurkunde en kan op basis daarvan aantrekkelijke, effectieve en efficiënte leeractiviteiten ontwerpen, uitvoeren, begeleiden en evalueren voor het schoolvak Natuurkunde in de onderbouw en/of bovenbouw.
8. Onverminderd het bepaalde in lid 1 heeft de afgestudeerde van afstudeerrichting Scheikunde een gedegen vakinhoudelijke kennis van en inzicht in het vakgebied en de vakdidactiek van Scheikunde en kan op basis daarvan aantrekkelijke, effectieve en efficiënte leeractiviteiten ontwerpen, uitvoeren, begeleiden en evalueren voor het schoolvak Scheikunde in de onderbouw en/of bovenbouw.
9. Onverminderd het bepaalde in lid 1 heeft de afgestudeerde van afstudeerrichting Wiskunde een gedegen vakinhoudelijke kennis van en inzicht in het vakgebied en de vakdidactiek van

Wiskunde en kan op basis daarvan aantrekkelijke, effectieve en efficiënte leeractiviteiten ontwerpen, uitvoeren, begeleiden en evalueren voor het schoolvak Wiskunde in de onderbouw en/of bovenbouw.

10. Onverminderd het bepaalde in lid 1 heeft de afgestudeerde van afstudeerrichting Aardrijkskunde een gedegen vakinhoudelijke kennis van en inzicht in het vakgebied en de vakdidactiek van Aardrijkskunde en kan op basis daarvan aantrekkelijke, effectieve en efficiënte leeractiviteiten ontwerpen, uitvoeren, begeleiden en evalueren voor het schoolvak Aardrijkskunde in de onderbouw en/of bovenbouw.
11. Onverminderd het bepaalde in lid 1 heeft de afgestudeerde van afstudeerrichting Informatica een gedegen vakinhoudelijke kennis van en inzicht in het vakgebied en de vakdidactiek van Informatica en kan op basis daarvan aantrekkelijke, effectieve en efficiënte leeractiviteiten ontwerpen, uitvoeren, begeleiden en evalueren voor het schoolvak Informatica in de onderbouw en/of bovenbouw.

Learning objectives of the minor Tesla

By completing the Tesla Minor the graduate is fit to start a career in demanding environments which require abilities to utilize the disciplinary science background in research, corporate, civil society, governmental and advisory work environments.

All learning objectives fall into at least one of the following categories: (1) Information processing (2) Teamwork (3) Project Work (4) Communication (5) Self-reflection.

Further information about the minor Tesla can be found in the study guide

<http://www.teslaminor.nl>

Minor teaching na een bachelor met een educatieve minor

De student volgt het tweede semester van de master leraar Voorbereidend Hoger Onderwijs (VHO) die de Interfacultaire Lerarenopleidingen (ILO) aanbiedt. De eindtermen komen overeen met die van de major teaching, zie hierboven.

Minor teaching na een bachelor zonder educatieve minor

De student volgt het eerste semester van de master leraar VHO die de ILO aanbiedt.

De opleiding leidt niet tot een bevoegdheid.

De eindtermen komen grotendeels overeen met die van de educatieve minor die de ILO aanbiedt.

De student is op basis van voldoende theoretisch inzicht, een professionele houding en voldoende vaardigheid in staat om:

1. een goede samenwerking met en tussen leerlingen tot stand te brengen;
2. voor groepen en voor individuele leerlingen een veilige leeromgeving te creëren;
3. voor groepen en voor individuele leerlingen een krachtige leeromgeving in te richten waarin leerlingen zich op een goede manier leerinhouden van het vakgebied eigen maken;
4. in groepen en in andere contacten met leerlingen een overzichtelijk, ordelijk en taakgericht leer- en werkklimaat tot stand te brengen;
5. relevante informatie uit te wisselen met collega's in de school en uitkomsten daarvan te benutten;
6. relevante informatie uit te wisselen met verzorgers van leerlingen buiten school en daarin te zorgen voor afstemming;

7. eigen opvattingen over het leraarschap en de eigen bekwaamheden als leraar, te expliciteren, kritisch te onderzoeken en verder te ontwikkelen op basis van theoretische inzichten en empirische gegevens.
