

PROJECT euclid

*Delivering essential scholarship and cost-effective
publishing services and subscription models for
the mathematical sciences since 2000*

Project Euclid, an initiative of Duke University Press, offers access to a growing platform of high-quality journals, monographs, and conference proceedings in the mathematical sciences.

Project Euclid supports global communities of researchers and promotes sustainable publishing practices to help small publishers remain independent, competitive, and affordable.

For Researchers and Institutions

- Essential scholarship from top-tier journals in their fields—with over two million pages of content openly available
- Subscription-based content available direct from publishers or through the **Euclid Prime** collection
- Advanced full-text searching and browse by title, publisher, and discipline
- PDF availability for all titles and growing amount of HTML content, with MathJax display engine for clearly rendered formulas and symbols on all web browsers

For Publishers

- Flexible participation plans tailored to the unique needs of independent and society publishers
- Global sales and marketing through Euclid Prime
- Delivery platform engineered to improve discoverability and enhance the impact of literature in the mathematical sciences
- Detailed usage statistics and reports, and content deposits to preservation systems
