

Euclid Prime Features

Euclid Prime is a collection of high-impact, peer-reviewed journals and book series in the mathematical sciences.

The 2026 collection, hosted by Project Euclid, includes current content from 29 titles.

KEY FEATURES

- Hosted by Project Euclid at projecteuclid.org, a Duke University Press initiative
- High-impact titles include: *Advanced Studies in Pure Mathematics*, *Illinois Journal of Mathematics*, *Kodai Mathematical Journal*, and *Rocky Mountain Journal of Mathematics*
- Highly international; in addition to seven US-based titles, the collection includes titles from Africa, Asia, and Europe, including *Afrika Statistika*, *African Journal of Applied Statistics*, *Hokkaido Mathematical Journal*, *Tohoku Mathematical Journal*, *Bulletin of the Belgian Mathematical Society – Simon Stevin*, and *Topological Methods in Nonlinear Analysis*.
- Interoperability through the Open Archives Initiative

SUBJECT STRENGTHS

Algebraic Geometry	Number Theory
Associative Rings and Algebras	Operator Theory
Commutative Algebra	Ordinary Differential Equations
Differential Geometry	Partial Differential Equations
Group Theory	Probability
Integral Equations	Real Functions

Euclid Prime Features

FEATURES FOR RESEARCHERS

- Full search options, as well as browse by title, publisher, and discipline
- PDF availability for all titles; growing amount of HTML content
- Device pairing authenticates authorized institutional users even after they leave campus
- MathJax display engine for clearly rendered formulas and symbols on all web browsers
- Cross-linking from articles and references to MathSciNet, zbMATH, arXiv, Google Scholar, and Crossref
- More powerful searches across the entire platform, cross-searchable with all content on Project Euclid, including open-access content
- Email alerts for new content, saved searches, and errata

ADDITIONAL INFORMATION

Further information about Euclid Prime:
dukeupress.edu/libraries

Further information about all titles available on Project Euclid, including open-access titles:
projecteuclid.org/subscriptions-and-access

Librarian tools for managing your account and usage statistics: projecteuclid.org/library-resources

FEATURES FOR INSTITUTIONS

- User account library for saving and sharing research
- Improved accessibility and data security
- COUNTER-compliant usage reports and SUSHI feeds for institutions and consortia
- Authentication via IP address, Shibboleth, and OpenAthens
- Textual and graphic branding for institutional subscribers
- Metadata feeds, KBART lists, and OpenURL look-ups for discovery vendors and indexers
- Google Scholar subscriber links and Campus Activated Subscriber Access
- No ongoing maintenance fees
- Perpetual access to all content from the year of purchase
- Term access to all back content during the year of purchase
- Annual accessibility audits and updates
- Institutional IP management through the IP Registry
