

Keeping Medicare Affordable in Missouri

Every day, the [Medicare Improvements for Patients and Providers Act](#) (MIPPA) helps people with Medicare afford their prescriptions, premiums, and doctor visits.

Who MIPPA Helps in Missouri

73,031 Medicare beneficiaries connected to benefits

441,771 Medicare beneficiaries living at or below \$22,500
(150% of the federal poverty level)

Joe's Story

Joe lived on less than \$1,000 per month. He applied for a Medicare Savings Program but never heard whether he was approved. A benefits counselor called the state and discovered that Joe's application had been missed. Recognizing the error, the agency turned on the benefits to help Joe with his Medicare Part B expenses and set them to be retroactive to the day he applied.

What MIPPA Does

Connects eligible individuals to benefits like the Medicare Savings Program and Medicare Part D Low-Income Subsidy, which help pay for prescription drugs, premiums, and copays

Promotes preventive health services and screenings

Keeps older adults healthy and out of hospitals

Potential Medicare Savings through MIPPA

One of the main components of MIPPA is to connect eligible Medicare Beneficiaries to programs to help them afford prescription drugs through Medicare Part D. Research shows that having prescription drug coverage through Medicare Part D could reduce hospitalization rates by 7%.¹ With an average Medicare hospital stay costing \$14,700,² connecting individuals to prescription drug coverage could create significant health care savings for both the patient and the government.

How MIPPA is Delivered in Missouri
