## **OurCounty 2023 Annual Report Draft for Public Comment**

Los Angeles County Chief Sustainability Office (CSO)

Response to Public Comment

| Source         | Name or Organization                       | Report Section     | Comment Summary   | Response                  |
|----------------|--|--------------------|---|---------------------------|
|                |  | Land               | Recommends the County DNA test people living on Native American         |                           |
|                |  | Acknowledgement,   | land to more accurately acknowledge and provide reparations to          |                           |
| Comment letter | Patricia McAll                             | Action 78          | Black Native Americans.   | Comment noted             |
|                |  |                    | Engage residents by incorporating the report in LAUSD classes and       |                           |
|                |  |                    | increase outreach on ecosystems work through public and builder-        |                           |
|                |  |                    | specific educational campaigns. Also ban artificial turf and expand     |                           |
| Comment letter | Martin Blythe                              | General, Goal 5    | action on leaf blowers.   | Comment noted             |
|                |  |                    | Action 92 should include updates on how the County is encouraging       |                           |
|                |  |                    | its workforce to go EV and should do things like reducing rates at      | Comment noted and         |
|                | Tarcis Verfaillie, LA County Department of |                    | County facilities, providing more chargers, and having employee EV      | shared with relevant      |
| Comment letter | Health Services                            | Action 92          | ambassadors.  | department                |
|                |  |                    |   | Comment noted and         |
|                |  |                    | Rowland Heights is not receiving it fair share of County fund and has   | shared with Supervisorial |
| Comment letter | Teri Malkin                                | General            | lost funding for parks projects, road repairs, and more.                | District Office           |
|                |  |                    | Recommend adding actions specific to Van Nuys Airport that address      |                           |
|                |  |                    | noise pollution, limitations on private aircrafts and helicopter tours, | Comment noted and         |
|                |  |                    | independent environmental and air quality studies, and moratorium       | shared with Supervisorial |
| Comment letter | Leah Nanni                                 | Goal 1             | on land use changes until EIA is made public.                           | District Office           |
|                |  |                    | Recommend focusing on homelessness actions first before creating        |                           |
| Comment letter | Sandra Parker                              | Goal 3, Goal 5     | more open space since it only exacerbates the issue.                    | Comment noted             |
|                |  |                    |   | Comment noted and         |
|                | Mike Bergey, Distributed Wind Energy       |                    | Recommend adding streamlining of small wind systems to OurCounty        | shared with revelant      |
| Office Hours   | Association                                | Goal 7             | Actions   | department                |
|                |  |                    | Recommend including cool paint as part of Action 29's heat island       |                           |
|                |  |                    | mitigation strategy. Recommend adding an action in Goal 6 that          |                           |
|                |  |                    | includes O&M for existing parks since accessibility can be limited by   |                           |
|                |  | Action 29, Goal 6, | the lack of maintenance. Action 42 should be expanded to include        |                           |
| Office Hours   | Kathy Kunysz                               | Action 42          | storm flooding risks and adaptation strategies due to climate change.   | Comment noted             |

|                |   |                         | Recommend a more comprehensive and thoughtful application of   |                           |
|----------------|---|-------------------------|--|---------------------------|
|                |   | Action 28A, Action      | mobility options, infrastructure, and traffic safety elements that   |                           |
|                |   | 28B, Strategy 3B,       | supports local needs and the OurCounty objectives. Support for   |                           |
|                | Dorothy Wong and Sarah Wolf, Altadena   | Strategy 3C, Action 58, | community capacity building is needed to improvement public input  | Comment noted and         |
|                | Town Council Safe Streets - Mobility &  | Strategy 8A, Action     | and engagement on policy issues and encourage local grant  | shared with Supervisorial |
| Office Hours   | Traffic Safety Committee                | 105, Action 150         | applications.  | District Office           |
|                |   |                         | Supports prioritizing Actions 127, 130, and 132 with specific recommendations pulled from their recently released "Fresh Ideas for |                           |
|                |   |                         | CalFresh Report" and "Rooted Horizons Report" on urban agriculture.  | Comment noted and         |
|                | Alba Velasquez, The Los Angeles Food    |                         | Also encourage the County to leverage its buying power to support  | shared with relevant      |
| Comment letter | Policy Council                          | Action 127, 130, 132    | the local food economy through the Good Food Purchasing Program.   | departments               |
|                | Joanna Chen - West LA Democratic Club's |                         |  |                           |
|                | Environmental and Clean Energy          |                         | Inquired about how she can help support the plan's goals, particularly   |                           |
| Office Hours   | Committee                               | General                 | those around clean energy.   | Comment noted             |
