Gregory Hills residents to benefit from new radiology clinic

SYDNEY 8 November 2018: Patients from the Campbelltown-Macarthur region now have improved access to a range of advanced medical scans following the opening of I-MED Radiology's newest clinic located within the new SOMA Health Hub in Gregory Hills.

The purpose-built clinic will provide the local community with access to specialised medical imaging services including low-dose CT, MRI, ultrasound, 3D mammography, general x-ray and interventional procedures, all at a convenient location.

Diana Graham, Regional Manager I-MED Radiology, said that although the local team has provided services to referrers and patients in Greater Western Sydney for many years, they are excited to now be located in the growing Gregory Hills area where they can contribute to a patient's integrated care.

"We have made a significant investment in the new clinic in order to deliver the very best environment for patients while providing access to advanced imaging technology for patients in this growing region."

The new facilities will be a welcome addition to the community, particularly the clinic's MRI service – the first to be installed in Gregory Hills.

MRI is an important medical diagnostic tool that is particularly useful for imaging soft organs like the brain and muscles that don't show up well on x-ray examinations. In particular MRI scans are useful in helping identify a range of neurological, musculoskeletal and spinal injuries and conditions.

In addition, the clinic boasts a superior CT scanner, providing considerably clearer and faster scans for tissues, arteries and veins of the body, as well as low radiation dose technology. Female patients can also access 3D mammography which is a major advancement over traditional mammography, significantly improving breast cancer detection and reducing false positive results.

I-MED Radiology's Gregory Hills clinic can be contacted on 4605 2000 and is located on the corner of Gregory Hills Drive and Holborn Circuit in the SOMA Health Hub (enter via Digitaria Drive).

About I-MED Radiology Network

I-MED Radiology Network is Australia's largest medical imaging network, offering diagnostic imaging and radiology services including x-ray, PET, CT, MRI, Nuclear Medicine, Ultrasound, Mammography and interventional procedures.

Our 200 clinics are located in metropolitan as well as many regional and rural communities across Australia.

Our team of more than 300 radiologists, including some of the most respected and experienced medical imaging specialists in Australia, performs more than 4.2 million patient procedures each year. We encourage and facilitate sharing of clinical knowledge and expertise, and can provide second opinions in complex cases without delay. Our commitment to quality means we invest in the most up-to-date equipment to provide the best diagnostic imaging. Patient images can be stored indefinitely and can be accessed from any of our clinics across Australia.

We recognise that many of our patient procedures require sensitive management, and we are dedicated to offering our patients quality care that is respectful, personable and focused on achieving the best health outcomes.

I-MED Radiology Network
Comprehensive care. Uncompromising quality.
