Why I-MED for International Labour Organisation (ILO) standards imaging?

Trusted expert opinion: I-MED has the highest number of certified NIOSH B readers nationwide to read and report images to ILO standards.

International standards: All I-MED clinics can perform dust disease imaging to ILO standards.

Expedited turn-around time: Patients can access any of the 240 I-MED clinics nationwide for a dust disease scan with reports returned within 1-2 business days.

Continuum of patient care: Referring doctors can view images and reports electronically via I-MED's secure online referrer portal, providing referrers with a long-term record of their patient's respiratory health and easy comparison with previous imaging.

Chest X-Ray is available at all I-MED Radiology clinics.*

No appointment necessary.

*Queensland Coal Mine Workers are required to attend approved Queensland Government Coal Mine Workers' Health Scheme sites for ILO Chest X-Ray imaging.

For more details and a full list of I-MED's approved clinics please visit i-med.com.au/qldcoal-ilo
