Forest Lake community to benefit from new radiology clinic
Access to high end imaging services boosted by the opening of I-MED Radiology

19 March 2019: Patients and practitioners in Forest Lake now have improved access to the latest in medical imaging, thanks to the opening of the brand new I-MED Radiology Network clinic in the heart of Forest Lake.

The modern purpose-built clinic gives the local community specialised medical imaging services including ultra low-dose CT, 3T MRI, ultrasound, general and dental x-ray, bone mineral densitometry (DEXA), echocardiography and interventional procedures. The clinic's smart new surroundings are designed to make patients feel comfortable and welcome.

Ben Brock, Regional Manager of I-MED Radiology, said that I-MED has provided highly specialised services to referrers and patients in Brisbane for many years and were now pleased to bring these services to a growing area like Forest Lake.

"A commitment to providing high quality and expert care is at the centre of everything we do at I-MED Radiology. We have made a significant investment in the new clinic's facilities so as to deliver the very best environment for our patients. Our team of imaging experts are focused on working together with local clinicians to deliver the best health outcomes for locals."

Specialist radiologist Dr Catherine Jones, who leads the experienced team of medical imaging technologists, said the new clinic would be a welcome addition to the community, particularly the clinic's 3T MRI and ultra-low dose CT service.

"We are pleased to be the first to provide a 3T MRI service in the area. It means that patients no longer need to travel outside of the Forest Lake area in order to have these scans. We have also installed the latest in ultra-low dose CT technology which demonstrates our focus on providing the community with highest quality imaging and faster diagnosis all with the lowest radiation doses possible," she said.

The new clinic will be officially opened by Federal Member for Oxley, Mr Milton Dick MP at 10:30am, Tuesday 26th March 2019.

I-MED Radiology CEO, Steven Rubic, said Forest Lake was one of four new clinics recently opened in Queensland by Australia's largest medical imaging network.

"We are thrilled to be able to provide the local community with world-class medical care. It enables our doctors to deliver improved diagnosis for multiple conditions, ensuring effective treatment plans can be put into place sooner," Mr Rubic added.

I-MED Radiology's new clinic is located at 255 Forest Lake Boulevard, Forest Lake. To make an appointment please call 07 3548 6800.

About I-MED Radiology Network

I-MED Radiology Network is Australia's largest medical imaging network, offering diagnostic imaging and radiology services including x-ray, PET, CT, MRI, Nuclear Medicine, Ultrasound, Mammography and interventional procedures.

Our 215 clinics are located in metropolitan as well as many regional and rural communities across Australia.

Our team of 315 radiologists, including some of the most respected and experienced medical imaging specialists in Australia, performs more than 4.2 million patient procedures each year. We encourage and facilitate sharing of clinical knowledge and expertise, and can provide second opinions in complex cases without delay. Our commitment to quality means we invest in the most up-to-date equipment to provide the best diagnostic imaging. Patient images can be stored indefinitely and can be accessed from any of our clinics across Australia.

We recognise that many of our patient procedures require sensitive management, and we are dedicated to offering our patients quality care that is respectful, personable and focused on achieving the best health outcomes.

I-MED Radiology Network
Comprehensive care. Uncompromising quality.
