

IMPROVE PRODUCT RELEASE IN CONDITIONING APPLICATIONS WITH INTRALOX S2900 CURVED TOP BELTS

Part of our revolutionary DirectDrive™ System, Intralox® Series 2900 Curved Top belting brings exceptional product release to spiral freezing, cooling, and proofing applications. The belt's surface design enables smooth transfers, and its lack of chordal action optimizes scraper placement for release of challenging products such as fish, poultry, or raw dough.

Features and Benefits

Reliably smooth DirectDrive technology gently handles delicate products

Continuous curvature of belting around sprockets allows scrapers to be placed closer to the belt

Curved Top design enables superior product release and smooth infeed and outfeed transfers

Open belt area improves product conditioning and simplifies cleaning
