

AUTOMATED CLEAN-IN-PLACE MODULE: QUICK WET CLEANING FOR YOUR INTRALOX EQUIPMENT

The Intralox® automated Clean-in-Place (CIP) module is a quick wet-cleaning solution designed to complement our beverage industry partners' overall cleaning programs. This automated, push-button solution eliminates the manual aspects of quick wet cleaning, reducing labor needs. It helps remove residue buildup from product spills and leakage so your Intralox equipment can operate as intended. It's ideal for quick wet cleaning during product changeover or planned downtime.

The automated CIP module is currently available when you choose the following Intralox equipment:

- **Activated Roller Belt™ (ARB™) Switch S7000 and S7050**
- **ARB Multilane Divider S7050**
- **ARB Turner Divider S7050**
- **ARB Turner Divider Reject S7050**
- **ARB Turner Divider Bypass Reject S7050**

Designed to clean spills and residue from:

- **Sugary liquids**
- **Sticky liquids**
- **Yeast-based liquids**

Features and benefits:

- **Easy, push-button operation**
- **Reduced labor needs**
- **Simplified process for maintaining equipment performance**
