

MINIMIZE PRODUCT LOSS AND CARRY-OVER WITH BARDRIVE S8026 NUB TOP BELTING

Intralox's Nub Top™ belt surface improves product control and conveyor performance in applications with slippery or sticky products. By combining this surface's superior grip and release characteristics with ThermoDrive® technology's hygienic properties, BarDrive™ Series 8026 Nub Top belting helps you minimize product loss and carry-over.

Benefits and Features

- **Produced by Intralox as a fully extruded, finished product**
- **Large nub count improves product grip and release**
- **Specialized nub pattern simplifies splicing and flight fabrication**
- **Tensionless ThermoDrive technology improves reliability and food safety**
- **Full-width drive bar provides up to 950 lb/ft (431 kg/m) in steady pull performance**
- **Now available in widths up to 72 in (1,828 mm)**
