

THE BEST CONVEYOR TECHNOLOGY FOR BODY SHOP AND PAINT SHOP AREAS

For body shop and paint shop areas, you need a conveyance solution that solves problems, not one that causes them. Steel chains and rubber belts are noisy, can cause skid damage and tracking issues, and require constant lubrication—all costly challenges to automotive plant operations.

Intralox's solution for body shop and paint shop areas, the Intralox SkidVeyor™ system, eliminates the problems of rubber belts and steel chains. Featuring the strongest, most durable modular plastic belt available for cross-skid and long track applications—the Intralox Series 10000 Flat Top (or Mold to Width Flat Top) belt—these systems enable greater load-carrying capacities, belt lengths, and belt life.

BENEFITS OF INTRALOX SKIDVEYOR SOLUTIONS FOR BODY SHOP / PAINT SHOP AREAS

- **Eliminate lubrication:** A lubrication-free solution, the Series 10000 belt reduces maintenance time, downtime, and the threat of contamination.
- **Eliminate skid damage:** The Intralox belt's flat-top polymer surface causes no damage to skids—a common issue with metal chain belts.
- **Reduce noise:** SkidVeyor systems improve plant ergonomics by offering a quieter, modular plastic solution.
- **No tracking issues:** Intralox SkidVeyor belts are positively driven; as a result, they (unlike rubber flat belts) never mistrack.

SKIDVEYOR BELT OPTIONS HELP PLANTS MEET APPLICATION NEEDS

Cross Skids: Impact- and abrasion-resistant, Series 10000 Mold to Width Flat Top belts deliver unmatched strength and stiffness to ensure extended belt life in dual-lane cross-skid applications.

Long Track Skids: The strength of the Series 10000 Mold to Width Flat Top solution also allows for increased load-carrying capacity and belt lengths, and its inherent stiffness reduces dynamic motion.

Full Width Skids: The Series 10000 Flat Top belt is the best choice for full-width skid applications where plant personnel ride alongside the skid or on a conveyor next to the skid. This belt is a superior alternative to regular slat or flat-top conveyors due to its low profile and lubrication-free operation.

WHY INTRALOX?

The wrong belt choice can be costly. With over 40 years of experience, Intralox offers the best technical recommendations and service. Our engineers provide advanced technical support before, during, and after the sale. Our customer service representatives are available 24 hours a day, 7 days a week. In addition to fully supporting customers with exceptional service levels throughout the world, we offer the strongest written money-back guarantees in the industry.

- Intralox guarantees belt performance in all applications approved by an Intralox account manager, sales engineer, or customer service representative—or you get your money back, unconditionally.
- Custom guarantees for belt life, wear, and productivity are available—contact us for details.

Please contact us to learn more about Intralox's solutions for body shop and paint shop applications. We will work with you to provide **custom payback analysis**, comprehensive engineering calculations, and conveyor design support.
