The Global Alzheimer's Association Interactive Network
Connecting Scientists Worldwide
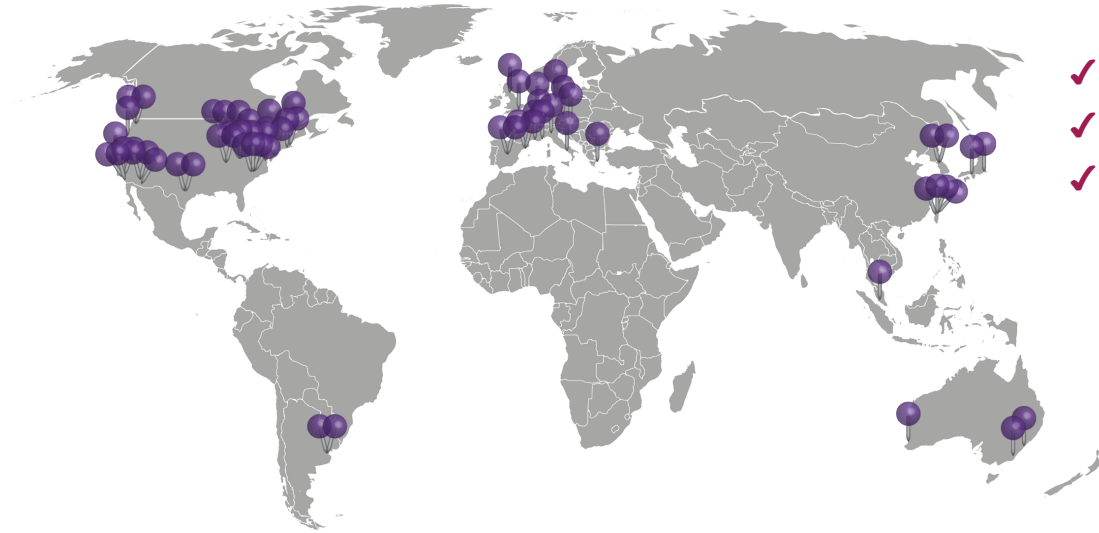

GAAIN
ALZHEIMER'S ASSOCIATION

Transforming Alzheimer's Disease Research

GAAIN has developed the first operational online integrated research platform, which links scientists, shared data, and sophisticated analysis tools. Investigators can address scientific questions of unprecedented complexity by accessing massive shared data sets and can share their own data by joining our global network of Alzheimer's disease study centers.
✔ 70+ Data Partners
✔ 700,000+ Subjects
✔ 38,000+ Data Attributes

Sign up for the GAAIN Interrogator

Explore the GAAIN Interrogator

Visualize relationships between attributes in user defined cross-study cohorts.

Pool multiple data sets
Create custom cohorts
Define pooled variables

Run preliminary analyses using variables you create.

Logistic regression
Linear regression
Cox regression
Mantel-Haenszel Meta-analysis

Request full data access and connect with Data Partners that meet your research goals.

Data Use Application URL
Link to application

Become a Data Partner

Contribute to Alzheimer's disease and related dementias research by sharing your data with scientists, students and policymakers around the world.

Retain full control of data

Satisfy data sharing requirements

Facilitate collaborations

Expand the impact of your research

The GAAIN platform can handle thousands of attributes and multiple data types, including:

- *Demographic*
- *Genetic*
- *Biosamples*
- *Medical History*
- *Neuroimaging*
- *Cognitive*
- *Behavioral*
- *Family History*
