UltraColor™ Soft Application Instructions

- For application on cotton, polyester or poly/cotton blends.
- An extra transfer is provided for testing purposes.
- Before applying, check your transfers for spelling, color placement, etc.
- Trim black registration marks along edge of gang sheets before applying.

**Washing Instructions:** For best results- Wash inside out, warm; dry on low.

1. **Set Your Heat Press**
   If not a Hotronix® heat press, add 10°
   **Temperature:** 290-320°F for 100% polyester and synthetics
   340-360°F for cotton and cotton/poly blends
   **Time:** 12-15 Seconds
   **Pressure:** Med/Firm 5-7 (50-70psi)

2. **Preheat Your Apparel**
   - Place apparel on platen and press for 3-5 seconds

3. **Position Your Transfer & Press**
   - Place the transfer image side down on the apparel
   - Cover transfer with provided cover sheet to eliminate static
   - Close machine and press for 12-15 seconds

4. **When “COLD” - Peel Transfer Carrier**
   - Open machine and peel off the backing in a smooth, even motion when cold (this may take several minutes to cool completely)

**Tips:**
- Do not use a pillow
- If you notice edges raising or if the clear outline is more defined due to the fabric color, take your cover sheet, lay over the transfer, close machine for 4 seconds, open the machine and immediately remove cover sheet
