Basketball Uniforms

- Mesh - manufacturers do sell 100% polyester mesh

- Place slip sheet between fabric so ink does not go through to other side. (or “dress” platen)
- If you want the holes to poke out during application use material such as pellon or an old shirt so that the ink that pokes through the hole attaches
- If it does not matter if the holes poke out you can use Teflon or the slip cover on the platen and wipe down between applications
- For nylon Mesh use Cad-Printz™
