

Essential Doody Enterprises Resources Available from Rittenhouse

2021 Doody's Core Titles and the Latest Doody's Special Topics List are Now Available to Support Health Sciences Collection Development

The wait is over. [Rittenhouse](#) is pleased to announce that the 2021 Edition of Doody's Core Titles (DCT) has been released, and is now integrated across [Rittenhouse.com](#) and [R2library.com](#). The DCT health sciences list and collection development tools from Rittenhouse are now available for free to Rittenhouse academic library and hospital partners.

2021 Doody's Core Titles

DCT is a trusted and essential list released annually by Doody Enterprises, Inc. With the support and expertise of almost 200 medical librarians and content experts, DCT recognizes excellence in clinical and educational books across more than 121 health sciences subject areas.

"The Doody's Core Titles Update tool on [Rittenhouse.com](#) enables an instant review of print titles on the current Doody's Core Titles list that have not yet been purchased," said Nicole Gallo, Executive Director Sales & Marketing at Rittenhouse. "This free tool is one way we can provide support services for collection management."

Rittenhouse also offers [R2 Digital Library](#) eBook collections based on the new 2021 DCT list. The [R2 Digital Library](#) has 514 DCT eBooks available, which offers one of the most extensive collections available.

Doody's Special Topics Lists

In 2020, Doody Enterprises began releasing a new series, Doody's Special Topics Lists, which are curated eBook collections focused on specific topics in health sciences. To date, Rittenhouse has Doody's Special Topics Lists available in the areas of health equity, telemedicine, and health professional stress.
