

Get in the Driver's Seat with the TASB Energy Cooperative

The PowerBuy® platform gives school districts and governmental entities like yours access to a wholesale marketplace, where you can:

- Achieve ideal pricing by having sellers bid against each other for your business in an online reverse auction.
- Lock in low prices for affordable electricity by leveraging dips in the market, resulting in greater budget certainty for years to come.

Members with larger usage can leverage their volume needs, while smaller members benefit from economies of scale.

About TASB Energy Cooperative

The Texas Association of School Boards Energy Cooperative is one of the largest aggregators of electricity in the state of Texas, serving more customers than the combined population of the Austin and San Antonio metro areas.

How PowerBuy works

How PowerBuy works

1 Our team of experienced market strategists use market data to assist you in determining the best time to buy.

2 You select the time and desired strike/fixed price, based on market conditions.

3 You attend a virtual PowerBuy reverse auction, where sellers compete against each other in real-time, providing you and other buyers in the pool with the best deal.

Buyers like you are pooled, when advantageous.

4 The auction is completed in minutes, complete with a RFP and terms and conditions.

As sellers bid against each other for your business, prices are driven down
