

Flexcon® MedFlex® product line

Medical device labeling & tracking solutions

The FDA requires medical devices to have product markings that remain intact and legible throughout the lifetime of the device. MedFlex® pressure-sensitive labeling products meet the challenging demands for labeling Class I and II medical devices used outside of the body. MedFlex® products are UL Recognized and are compliant with IEC 60601-1 3rd edition for marking durability rub tests. These films are immediately adoptable into your UL listing.

Printable films

- Cross platform printability
- Exceptional fine printability and barcode scanning with super smooth 2 mil polyesters
- Smudge proof and abrasion resistant thermal transfer printing with our robust gloss and matte topcoats
- Avoid label lifting for the life of the medical device with permanent solvent-based acrylic biocompatible adhesive
- Sustainable 50 lb. roll-form release liner made from up from 30% post-consumer waste
- UL Verified (V487460) with 6 additional cleaning agents

Overlaminates

- 1 mil gloss clear and matte clear polyester overlaminates ensure label legibility remain intact for the lifetime of the medical device
- Permanent solvent-based biocompatible adhesive prevents lifting and flagging from the printed base film
- 1 mil ultra smooth clear polyester liner for excellent adhesive wet out yielding optimum clarity
- UL-recognized

Flexcon® MedFlex® product line

Medical device labeling & tracking solutions

Global availability - United States, Europe, & Asia

Quick-ship

- 54" master rolls - MedFlex® Plus MMSMGS50K
- 60" master rolls - All other MedFlex® products

Sample availability - United States & Asia

- 6" x 500' rolls
- 6" x 10" sheets

Consistent quality

Change management process is designed to ensure consistent material performance.

Stringent
requirements

Tight controls on quality and performance with raw material specifications and annual supplier audits

Advanced
notification

Material suppliers communicate changes to raw components in advance

Thorough
review

Supplier changes reviewed by R&D, Quality, and Manufacturing teams

Customized
test plans

Test plans in place to ensure consistent product performance
