FLEXcon® Fit Test Hood | Single-use Replacement Test Hoods for Qualitative Fit Testing

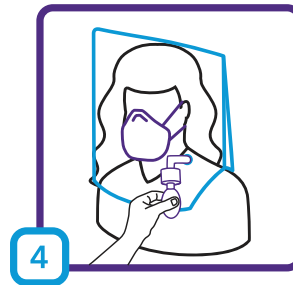

1 Orient the single-use hood so that the bottom opening is easily accessible. There is no front or back.

2 Ask the participant to properly apply the face mask.

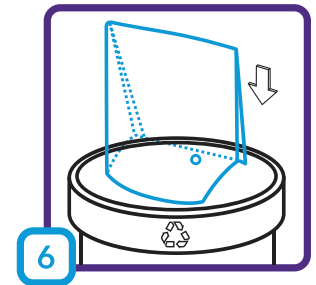

3 Open the hood and place on the participant, make sure it fits right on the shoulders.

4 Place the nebulizer in the hole and disperse the solution.

5 Instruct the participant to read the story passage and check if they can detect the smell or taste of the solution.

6 Upon completion of the test, remove the hood and discard in the recycle bin.
