

Flexcon® DPM® EcoFocus® Product Line

PCR content in both film and liner

Target markets

- Consumer durables, electronics, transportation, and industrial

Recommended applications

- Brand identification, compliance tracking, safety/hazard/instructional label, and more

Benefits

Sustainable base films and overlaminate

- Gloss topcoated 2.0 mil clear and white polyester with 30 - 90% post-consumer recycled (PCR) content provides a smooth, uniform surface with excellent dimensional stability and dependable performance across a wide temperature range.
- High-gloss 1.0 mil clear polyester overlaminate with 90% PCR content offers consistent clarity, dimensional stability, and reliable durability in varied temperature conditions.

Versatile printability

- Printable films are compatible with resin and wax/resin thermal transfer, UV and solvent screen, UV, solvent and water-based flexo, and UV narrow-format inkjet technologies.

High-performance adhesive

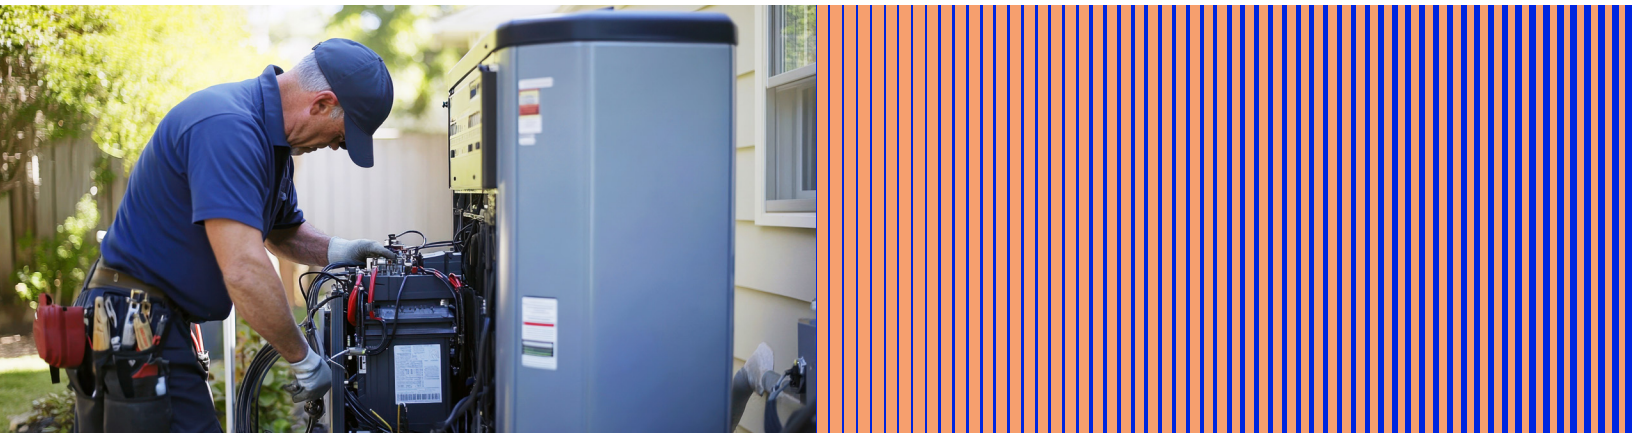

- Formulated with high shear and peel strength to resist cold flow and oozing, ensuring strong, lasting bond on a wide range of surfaces (base films) and secure anchorage to printed surfaces (overlaminate).

Eco-friendly liners

- 50 lb. bleached Kraft (base film) and 0.92 mil clear polyester (overlaminate) with 30 - 90% PCR content, reducing reliance on virgin raw materials.

Proven compliance

- UL Recognized under UL 969 (File No. PGGU2.MH16635) for printing materials and UL 969 (File No. PGGU2.MH10170) for overlaminates, confirming durability and reliability in demanding applications.
