Clot Management

Fogarty® Arterial Embolectomy Catheters

Removal of fresh, soft emboli and thrombi from vessels in the arteries of the non-central circulatory system

- Hand tied using a recessed winding technique to secure balloon to catheter
- Balloon exhibits a symmetry that exerts uniform contact with vessel walls for even pressure and precise traction
- Rounded tip promotes easy insertion for reduced trauma

Fogarty® arterial embolectomy catheters

1 unit per tube pack

Fogarty® Fortis Arterial Embolectomy Catheters

Removal of fresh, soft emboli and thrombi from vessels in the arteries of the non-central circulatory system

- Can withstand greater pull-force than the Fogarty arterial embolectomy catheter

Fogarty® Fortis arterial embolectomy catheters

1 unit per tube pack

Color	Model number	Usable length (cm)	Catheter size (F)	Inflated balloon diameter (mm)	Max. size of deflated balloon (f)	Max. gas capacity (ml)	Max. liquid capacity (ml)	Compatible introducer (f)	Removable stylet

Fogarty® Thru-Lumen Embolectomy Catheters

Multi-use guidewire-compatible design enables removal of fresh, soft emboli and thrombi from vessels in the arterial system as well as temporary occlusion of blood vessels, infusion of fluids, and blood sampling

- Fogarty® balloon conforms to the vessel to maximise clot removal while minimising trauma
- Provides the solution for distal thrombus removal in the arterial system
- The addition of barium* to the catheter shaft material and stainless steel markers proximal and distal to the balloon provide radiopacity*

* 3F thru-lumen embolectomy catheter body does not include barium.

Fogarty® Corkscrew Clot Catheters

Removal of emboli and thrombi from either native vessels or synthetic grafts in the arterial system

- For extracting the arterial plug and thrombus that is too resistant for an elastomeric balloon
- Corkscrew design increases the surface area for entrapping fibrous material
- Radiopaque and flexible

Fogarty® Corkscrew clot catheters

1 unit per tube pack

Color	Model number	Usable length (cm)	Catheter size (F)	Membrane/spiral diameter max. extended (mm)	Membrane/spiral diameter max. retracted (mm)
●	140806	80	4	2.7	6
○	140808	80	5	3.1	8
●	1408010	80	6	3.3	10

Fogarty® Graft Thrombectomy Catheters

Designed for removing organised thrombus and adherent thrombotic material from synthetic bypass grafts, specifically, AV fistulas for dialysis access and grafts for iliofemoral bypass

- For extracting thrombus too resistant for an elastomeric balloon
- Provides a larger diameter range than the Fogarty® adherent clot catheter
- The pulling force can be varied by adjusting the diameter

Fogarty® graft thrombectomy catheters

1 unit per tube pack

Color	Model number	Usable length (cm)	Catheter size (F)	Membrane/spiral diameter max. extended (mm)	Membrane/spiral diameter max. retracted (mm)

●	160246F	50	6	6.0	18

Fogarty® Venous Thrombectomy Catheters

Designed for removing thrombi in the venous system

- The long, soft tip facilitates advancement past the venous valves without undue trauma

Fogarty® venous thrombectomy catheters

1 unit per tube pack

Color	Model number	Usable length (cm)	Catheter size (F)	Inflated balloon diameter (mm)	Max. size of deflated balloon (f)	Max. gas capacity (ml)	Max. liquid capacity (ml)

Atraumatic Occlusion

Fogarty® Occlusion Catheters

- Fogarty® occlusion catheters are indicated for temporary vessel occlusion
- The large occlusion catheters are intended to be used for temporary occlusion in the aorta, vena cava and internal jugular vein
- The small occlusion catheters are intended to be used for temporary occlusion in the peripheral vascular system

Fogarty® occlusion catheters

1 unit per tube pack

Fogarty® Spring Clips and Handleless Clamps

- Spring clips are designed to provide a consistent degree of tension
- EverClip reduced force spring clip is designed to minimise vessel trauma while maintaining occlusion
- Handleless clamps ratchet-type mechanism allows for desired degree of pressure
- Spring clips and handleless clamps are radiopaque for visualisation under fluoroscopy
- Not made with natural rubber latex
