

WE DELETE BLOOD CANCER

Let's Get Registered!

Review

the "Get Ready to Register" sign and ensure that the potential donor meets the eligibility requirements and understands the two methods of donation. If the potential donor specifies a medical condition not listed on the Get Ready to Register sign, please refer to the Assessment Tool (Use QR Code on Get Ready to Register sign).

Complete

the registration form and make sure the potential donor signs the form.

Write

the drive code in the upper right corner of the form.

Remove

one of the barcode stickers from the top of the registration form and place it in the designated spot on the swab envelope.

Instruct

the potential donor to swab according to the instructions on the swab envelope. Each of the 3 swabs should be used separately, swabbing the inside of the cheek for at least 60 seconds. Seal the swab envelope when complete.

Double Check

that the registration form is complete and was signed by the potential donor, the barcode sticker is on the swab envelope, and the swab envelope is sealed.

Give

the second page of the registration form to the potential donor, along with a BIG THANK YOU!
