

VT Downing Global Investors Fund

July 2021 Commentary

The price of the F share class accumulation units in the VT Downing Global Investors Fund went from 160.5036 pence to 166.1043 pence during the month.

For this month's report, it is hard to better the following extract from the six monthly report from Biesse, one of our global engineering businesses which is based in Italy. Not tech or Electric Vehicles (EVs)...but cutting machines.

"To understand the renewed sense of confidence seen in the first months of the year, we can look to the index of orders for the first half of 2021 calculated by the Economic Studies Department & Business Culture at UCIMU (Italian Machine Tools, Robots, and Automation Systems and Manufacturers' Association). The index reflects the orders received by Italian manufacturers in domestic and foreign markets. In the first half of 2021, the order index soared by 88.2%, with the result driven by the positive feedback manufacturers received in both markets. Specifically, domestic orders were up 238% compared to the period January-June 2020, while foreign orders climbed 57.5% year-on-year. Barbara Colombo, Chair of UCIMU SISTEMI PER PRODURRE, stated: "2020 year-end figures clearly show the impact of this extremely severe and unexpected health crisis, but it is also apparent that the year ended with results above our initial expectations. The outlook for 2021 appears to be completely different: there is a sense of confidence that keeps on growing and consolidating every month, as order intake figures show". The numbers warrant re-reading because they are so large. It had appeared that stock markets might be getting a bit lofty earlier in the year. It now looks as if they might be anticipating a walloping economic recovery that is beginning to show itself. Colombo, did say one other thing of note, "However, there are two factors that risk undermining the nascent recovery: rising commodity prices, and the shortage of electronic parts".

The fund is well invested in both commodities generally, and electronic parts.

As Maximus epically said, "Are you not entertained?!"

About the fund

The VT Downing Global Investors Fund is a thematically invested fund focused on the needs and wants of the growing middle-class population.

We believe this population is a homogeneous borderless group, showing a single set of demands and aspirations. Currently numbering around 3.3 billion, we believe the global middle-class will be closer to 5.3 billion at the end of this decade.

That is a needle-moving demographic to be engaged with that will drive our six key themes:

Investment strategy

We use pattern hunting strategies to identify areas of economic activity attracting capital. We buy equity stakes in businesses that supply the needs and wants of the expanding global middle class population. We seek to invest in the leading companies within any business grouping we identify.

Liquidity

Our top-down conviction primarily leads to larger capitalisation businesses and aims to avoid undue exposure to any single factor. We balance defensive and cyclical stocks and sectors depending on where we are in the business cycle.

Investment objective

The fund aims to achieve capital growth and income over the long term (5+ years) across global markets.

It will invest at least 70% in equities globally with up to 20% invested in higher risk emerging markets.

The fund will invest in any geographic, industry or economic sector on merit and weightings in these will vary with circumstances.
