

VT Downing Global Investors Fund

June 2021 Commentary

The price of the F share class accumulation units in the VT Downing Global Investors Fund went from 155.1090 pence to 160.5036 pence during the month.

June was strikingly stable relative to many months recently. Periods of calm often presage a strong move one way or another and imply known knowns and unknowns are priced to a broad consensus. That can imply complacency, but it can also imply a regrouping. In this context, two of the favoured sectors in 2020, technology and the broad area of transition from carbon, have endured very sharp sell offs in 2021, which appears to have stabilised over May and June. If that is a correct interpretation, then regrouping is more likely than complacency. That view, in turn, seems supported by the 30 year US treasury yield which has trended flat to lower since March, despite a strengthening global economy. Similarly, our portfolio has seen little change over the month in terms of asset allocation and remains broadly exposed, across multiple business areas, to the middle class budget.

About the fund

The VT Downing Global Investors Fund is a thematically invested fund focused on the needs and wants of the growing middle-class population.

We believe this population is a homogeneous borderless group, showing a single set of demands and aspirations. Currently numbering around [3.3 billion](#), we believe the global middle-class will be closer to 5.3 billion at the end of this decade.

That is a needle-moving demographic to be engaged with that will drive our six key themes:

Fund Manager
Anthony Eaton

Anthony joined Greig Middleton in 1991 and was appointed a director in 1996. He moved to JM Finn & Co in 2001 and became lead manager on the CF JM Finn Global Opportunities Fund in 2005 where he returned a 10.4%* compound annual growth rate through to August 2019 when it was sold to Thornbridge.

He has consistently applied an evolutionary strategy over the past 15 years as the global middle-class phenomenon has gained momentum. His investment process focuses on producing compounding returns, with a view to generating growth over the long-term.

Investment strategy

We use pattern hunting strategies to identify areas of economic activity attracting capital. We buy equity stakes in businesses that supply the needs and wants of the expanding global middle class population. We seek to invest in the leading companies within any business grouping we identify.

Liquidity

Our top-down conviction primarily leads to larger capitalisation businesses and aims to avoid undue exposure to any single factor. We balance defensive and cyclical stocks and sectors depending on where we are in the business cycle.

Investment objective

The fund aims to achieve capital growth and income over the long term (5+ years) across global markets.

It will invest at least 70% in equities globally with up to 20% invested in higher risk emerging markets.

The fund will invest in any geographic, industry or economic sector on merit and weightings in these will vary with circumstances.

Please note that past performance is not a reliable indicator of future results.

Risk warning: Your capital is at risk. Investments into this fund should be held for the long term (+5 years). The value of your investment and income derived from it can fall as well as rise and investors may not get back the full amount invested. Values may be affected by fluctuations in currency exchange rates and may cause the value of your investment to go up and down. In addition, investments in emerging markets or less developed countries may face more political, economic or structural challenges than developed countries and your money is at greater risk. Past performance is not a guide to future returns. Please refer to the latest Full Prospectus and KIID before investing; your attention is drawn to the risk, fees and taxation factors contained therein.
