

# PTI FARM | NORTH DAKOTA

## INTERNSHIP OVERVIEW

The Precision Planting PTI North Dakota Farm is a 300-acre research farm located in Casselton, North Dakota. This farm showcases Precision Planting Technology, Core Principles, and Planting Fundamental trials across 5 major northern crops. Throughout the summer, Precision Planting invites growers from all over the world to come and learn agronomy and experience the technology first-hand. PTI Interns will receive hands-on experience in many different areas of agronomy at the Casselton, North Dakota location. This internship will focus on cutting-edge agronomy and sound farming practices that are pertinent to today's farmers. We are aggressive and work hard, but you will have fun and be challenged technically.

### Responsibilities:

- Operate agricultural equipment to conduct product testing.
- Perform daily field operations as needed such as tillage, planting, spraying, mowing, cultivating, and fertilizer application.
- Coordinate, execute, and measure field-based product trials. Maintain plots in good visual condition during the growing season through mowing, weeding, and tilling.
- Assist with installation of field trial equipment.

### Desired Skills/Experience:

- Current student pursuing a bachelor's degree in Agriculture or a related field.
- Must have the ability to operate equipment & machinery and lift up to 50lbs.
- Willingness to work outside and in the office.
- Ability to multi-task, problem-solve, and prioritize.
- Strong interpersonal skills to effectively communicate with peers and management.
- Comfortable speaking to large groups.
