### **Notice to Manufacturers**

#### **Proposed Change To The Maximum Length For Clubs Other Than Putters**

The R&A and USGA issued a Notice on 17 October 2016 advising manufacturers of a proposed change to the maximum length for clubs other than putters.

On 15 May 2018, The R&A and USGA launched the Distance Insights project to comprehensively analyse distance in golf, its causes and effects.

This is a separate process and it has been determined that while it is evolving, there will be no change to the current Rules regarding the maximum length for clubs other than putters.
