About

En

Kontrast Grotesk Display & Grande are true display companions for Kontrast Grotesk, reinterpreting the features of Kontrast Grotesk into display sizes. There are many differences making the typeface works better in big sizes. These includes changes like – equal height of the uppercase and ascenders, tighter character spacing, no inktraps and narrower diacritic signs. Proportions are little different as well. Family have been extended from 5 to 12 weights (from super slim Hairline to Ultra Black).

Kontrast Grotesk Display

Display is intended to use for headlines and big sizes.

Kontrast Grotesk Grande

Uppercase, lowercase and numbers have the same thickness as Kontrast Grotesk Display. Other symbols and diacritics are thin. Grande can be used in even bigger scale.

Kontrast Grotesk Display&Grande

Combines the two styles into one font.
