A PROBLEM SHARED

TALKING ABOUT
MENTAL HEALTH

A PROBLEM SHARED: TALKING ABOUT MENTAL HEALTH

[Louise Spilsbury](#)

A positive and proactive book that helps you understand and cope with mental health problems.

There's two sides to every story. In *Mental Health*, you will read two sides to some common dilemmas, sticky situations or issues that children sometimes have to face at difficult times in their lives. *Mental Health* tackles situations including: academic anxiety, eating disorders, PTSD and self-harming.

The book is structured to help readers see that problems might look different depending on your perspective. This book gently encourages children to be proactive in speaking up and asking for help, both for themselves and others.

It shows some simple ways to positively resolve situations, deal with their emotions and maybe even change their mind.

The book includes top tips for dealing with your emotions and conflict resolution.

The *A Problem Shared* series looks at tricky situations and common problems from two sides. The books encourage the reader to not only speak out, but also to listen to what others have to say. Some of the core values of PSHE are empathy, mindfulness and engaging with debate and this series puts the reader firmly in the middle, allowing them to make up their own mind about the scenarios presented and to question their own initial assumptions or bias.

Perfect resources for students of PSHE at Key Stage 2 aged 9+, these books are also useful as opportunities for discussion topics in class or as role play situations.

- ISBN: 9781445171296
- Format: Paperback
- Genre: Non-Fiction

The Emperor and the Seed

by Katie Dale
and Le Nhat Vu

READING CHAMPION: THE EMPEROR AND THE SEED

[Katie Dale](#)

Illustrated by [Le Nhat Vu](#)

This story is part of Reading Champion, a series carefully linked to book bands to encourage independent reading skills, developed with Dr Sue Bodman and Glen Franklin of UCL Institute of Education (IOE). This book is aimed at Independent Reading 12, for readers aged 7 years old and up, or in the second half of Year 3.

The emperor needs someone to take over his throne. When he challenges the children of his kingdom to grow the best plant they can from a seed he gives them, young Ling is dismayed – he can't get it to grow no matter what he does! When he brings his empty pot to the emperor, he knows he has lost the challenge. Or has he?

Reading Champion offers independent reading books for children to practise and reinforce their developing reading skills.

Fantastic, original stories are accompanied by engaging artwork and a reading activity. Each book has been carefully graded so that it can be matched to a child's reading ability, encouraging reading for pleasure.

- ISBN: 9781445172552

WE WILL REMEMBER THEM

[S. Williams](#)

Illustrated by [Oliver Averill](#)

Produced in partnership with the Royal British Legion, this beautifully illustrated non-fiction book explains to children why it's so important to remember those we have lost in wars.

The sensitively written text tells of the world wars as well as other wars that are remembered at this time. It explains the history behind poppies, why we hold 1- or 2-minute silences and what happens in commemorative parades around the world.

The book includes poems and quotes from veterans who bravely fought in these wars.

CREATE THE CODE: COMPUTER GRAPHICS

[Max Wainwright](#)

Discover how your everyday tech works while developing your coding skills!

Computer graphics are everywhere! From the icons and buttons you tap to open and navigate apps to the impressive special effects in movies, these are created by computers and more or less complex code. Let's take a look inside how these work and learn to code our own in *Create the Code: Computer Graphics*. Using Scratch and HTML, you'll create a simple drawing app, code an explosion and even make a 3D model of the Solar System.

Each book in the *Create the Code* series explains the key computer code and systems that are used to create and control the tech you use everyday such as the Internet, your smartphone, music and films and your apps. Step-by-step activities teach you how to create your own versions on screen with code.

The series uses Scratch, HTML and MIT's App Inventor as the coding languages.

Author Max Wainwright is a leading authority on teaching kids to code.

Perfect for coders aged 9 and up.

- ISBN: 9781526313614
- Format: Paperback
- Genre: Non-Fiction
- Extent: 32

CREATE THE CODE: SMARTPHONES

[Max Wainwright](#)

Discover how your everyday tech works while developing your coding skills!

Smartphones have become an extension of ourselves. We couldn't live without them. But how do they work? What's inside them and how are the apps we rely on so much created and designed? These are the topics explored in *Create the Code: Smartphones*. You'll also learn to code your own apps using Scratch and MIT's App Inventor: create emojis, code a web browser and make your own selfie filter app! Best of all: you'll get to test them on your own smartphone!

Each book explains the key computer code and systems that are used to create and control the tech you use everyday such as the Internet, your smartphone, music and films and your apps. Step-by-step activities teach you how to create your own versions on screen with code.

WASTED

[Clive Gifford](#)

Aimed at readers aged 9 and up, this book takes a look at the pollution and damage caused to our planet and the solar system through the lens of extreme waste manifestations, such as toxic smogs, grotesque fatbergs, mountainous landfills, marine garbage patches and space junk.

It explores these human-created phenomena, uncovering their causes and impact, and asks what is being done to deal with them and prevent their recurrence. Real-life photographs are included, bringing home the extreme awfulness and scale of the problem.

A QUESTION OF HISTORY: DID THE KINGS OF BENIN KEEP PET LEOPARDS? AND OTHER QUESTIONS ABOUT THE KINGDOM OF BENIN

[Tim Cooke](#)

Take a look at the wackier side of history!

Did the kings of Benin really keep pet leopards? Did spirits live in the African rainforest? And did bicycles REALLY destroy the Benin kingdom? A Question of History: The Kingdom of Benin answers all these questions and much more.

With an engaging question and answer format, this series draws young readers into the fascinating, sometimes gruesome, world of famous peoples and civilisations through history. Each spread opens with a simple question, opening up an exploration of an aspect of the life of a people or civilisation and busting some popular myths along the way!

The lively lay-out is supported by annotated photos and cartoons, making history fun and accessible for readers aged 8+.

- ISBN: 9781526315380
- Format: Hardback
- Genre: Non-Fiction
- Extent: 32

A QUESTION OF HISTORY: DID ROMANS REALLY EAT FLAMINGOS? AND OTHER QUESTIONS ABOUT THE ROMANS

[Tim Cooke](#)

Take a look at the wackier side of history!

Who was the maddest Roman emperor? Why didn't the Romans use toilet paper? And just how dangerous was a Roman tortoise? A Question of History: Ancient Rome answers all these questions and much more.

With an engaging question and answer format, this series draws young readers into the fascinating, sometimes gruesome, world of famous peoples and civilisations through history. EXPLORE AI: MACHINE LEARNING

[Sonya Newland](#)

Explore the technology that is changing our world!

Imagine a machine that can learn from experience and teach itself new things – that’s AI in action! Trace the development of intelligent machines from the earliest ideas to today’s technology. Discover how AI helps us in different ways, including problem solving and diagnosing diseases.

The *Explore AI* series takes a trip through the past, present and future of artificial intelligence. Explore the incredible AI applications in the world around us, and find out how AI engineers have modelled machine intelligence on our amazing human abilities and processes.

- ISBN: 9781526315113
- Format: Hardback
- Genre: Non-Fiction
- Extent: 32

EXPLORE AI: SMART DEVICES

[Sonya Newland](#)

Explore the technology that is changing our world!

Imagine a huge network of smart devices that can work together to collect, analyse and share data – that's AI in action! Find out how everyday devices, from smartphones to security systems, are already making our lives easier, safer and healthier, and discover what the smart homes and offices of the future might be able to do!

The *Explore AI* series takes a trip through the past, present and future of artificial intelligence. Explore the incredible AI applications in the world around us, and find out how AI engineers have modelled machine intelligence on our amazing human abilities and processes.

PREDATOR VS PREY: HOW SHARKS AND OTHER FISH ATTACK

[Tim Harris](#)

Does your child love to find out what makes sharks and other top fish predators experts at hunting? They will be staggered at the variety of techniques fish use to bring down their prey!

Hammerhead sharks pin their prey to the seabed, great whites have monstrous jaws filled with razor sharp teeth, groupers team up with wrasse in coordinated attacks and moray eels prefer to ambush their victims. Different techniques and adaptations are examined in detail, showing how fish predators are perfectly suited to their habitat and to the prey they pursue.

Each spread has dramatic photographs and looks in detail at one mammal predator and focuses on its primary weapon, such as speed, teeth or ambush. The prey animal shows us how it attempts to evade certain death, whether through camouflage, a speedy retreat or safety in numbers. Stat panels give readers a quick overview of how predator and prey stack up against each other.

Predators are awe-inspiring. Whether they are fast, strong, armed with claws or teeth, cunning, patient or venomous, they are all masters of the art of killing their prey. Young readers will love the *Predator Vs Prey* series with its amazing photographs and the details about super-senses or incredible adaptations. These books also highlight the variety of life on Earth and reinforces how animals are adapted to their habitats.

Suitable for readers aged 7+ who are either fascinated by wildlife or are studying natural history or animal adaptations or classification.
