FRESH FROM THE FARM

# SAFETY SUGGESTIONS

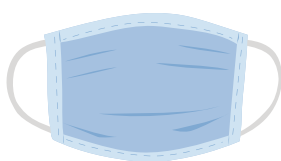

## **Check with local public health unit and schoolboard**

Research and follow local public health unit and schoolboard guidelines and regulations.

## **Wash hands before handling produce**

When sorting the vegetable bundles, ensure that volunteers have washed hands thoroughly with soap or sanitizer before handling any produce.

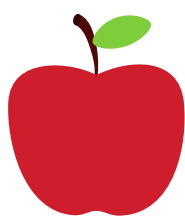

## **Wear a mask and active screen volunteers**

Ensure volunteers wear a mask or face covering which covers the nose, mouth and chin. Screen volunteers for any sickness symptoms.

## **One vegetable bundle sorted by one person**

Have the same volunteer fill one vegetable bundle to minimize touching, as opposed to an assembly-line type system.

## **Clean and disinfect surfaces and objects**

Ensure all surfaces and objects the produce will be touching has been properly sanitized.

Please note these are only suggestions and local public health unit and schoolboard regulations should be followed at all times
